

Driving decarbonization and digitalization. Together.

Specialist Procurement Supplier Sustainability

Job description

As a Procurement Specialist – Supplier Sustainability you will support the strategic development and implementation of our sustainable procurement framework

In your new role you will:

- Support the implementation of the global supplier engagement program to achieve carbon reductions in the supply chain (scope 3)
- Support the implementation of the sustainability risk management framework in procurement processes to ensure respect for human rights and environmental protection across the global supply chain
- Provide sustainability trainings for procurement colleagues and suppliers in the area of human rights and carbon management with a special focus on procurement teams and suppliers in Asia
- Act as a subject matter expert for sustainability within the procurement function and managing queries from the organization or external requests
- Ensure that high-quality processes and services are delivered on time and in an efficient way

Profile

You are best equipped for this task if you have:

- A degree in Sustainability, Business Administration, Economics, Industrial Engineering, mathematics or a similar field of studies
- At least 1-3 year of relevant work experience in sustainability management, sustainable procurement, carbon management, renewable energy, sustainability consulting or in a similar field – preferably in semiconductor or automotive industry
- You have interest in making a difference at the intersection of sustainability and procurement with your open mindset and passion for Infineon's success
- Using your analytical skills to turn complex information into relevant insights, interest in working with data, organized person with structured work approach
- Experience in supporting sustainability projects and using digital tools to improve work flows related to own field of expertise
- Experience in carbon emissions management; experience in interacting with suppliers on sustainability topics would be a plus
- Demonstrates the highest standards of professional behavior in dealing with stakeholders

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant 's experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
