Driving decarbonization and digitalization. Together.

Intern - Manufacturing

Job description

This opening is part of Infineon's Internship program. This Internship Program gives you the opportunity to assist in development and implementation of projects supported by the Manufacturing Department. #AmericasInterns

In your new role you will be responsible for:

- Factory Layout Design: Assist in the planning and design of factory layouts to
 optimize workflow and improve manufacturing efficiency, taking into account
 various factors such as machinery placement, employee safety, and product
 quality
- Al and ML Projects: Apply your knowledge of Al and ML to develop models and solutions that improve manufacturing processes and production quality, reduce waste, and maximize efficiency
- SECS/GEM Implementation: Work closely with our engineering team to understand and implement SECS/GEM protocols in line with SEMI standards to facilitate communication with semiconductor equipment.
- Process Improvement: Identify opportunities for process improvement and efficiency gains, and work collaboratively with cross-functional teams to implement these changes
- Data Analysis: Collect and analyze production data to identify trends and make recommendations for improvement
- Reporting: Prepare and present reports on project status and results to senior management and relevant stakeholders.
- Factory Simulation: Ability to learn or use software for Factory simulation projects/designs.

Profile

You are best equipped for this task if you have:

- Bachelors or Masters degree in Computer Science, Engineering Management, information systems, or related field
- 1-3 years work experience in **semi-conductor industry**
- Machine Learning, AI, SECs/GEM SEMI Standards knowledge or a Background in MES systems, development
- Ability to effectively present information in one-on-one and as a group to other employees of the organization
- High degree of professionalism in communication, attitude and teamwork with internal customers, peers and management

Why Us

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant 's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.

Driving decarbonization and digitalization. Together.

IR HiRel Products Inc., is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex (including pregnancy, childbirth, or related medical conditions), gender identity, national origin, ancestry, citizenship, age, physical or mental disability, legally protected medical condition, family care status, military or veteran status, marital status, domestic partner status, sexual orientation, or any other basis protected by local, state, or federal laws.

Employment at Infineon is contingent upon proof of your legal right to work in the United States under applicable law, verification of satisfactory references and successful completion of a background check and drug test, and signing all your onboarding documents.

In some instances, if applicable, U.S. export control laws require that Infineon obtain a U.S. government export license prior to releasing technologies to certain persons. This offer is contingent upon Infineon's ability to satisfy these export control laws as related to your employment and anticipated job activities. The decision whether or not to submit and/or pursue an export license to satisfy this contingency, if applicable, shall be at Infineon's sole discretion.

Infineon Technologies takes data privacy and identity theft very seriously. As such, we do not request personally-identifiable information (PII) from applicants over the internet or electronically. Please kindly refrain from disclosing your PII electronically during the application process or to unauthorized websites that may purport to be Infineon or any of our affiliates.

This position requires access to documentation that is controlled by the export laws of

the United States. Candidates are required to provide proof of either US citizenship, Permanent US residency or classification as a protected individual as defined in 8USC 1324b(a)(3).
