

Driving decarbonization and digitalization. Together.

Senior Engineer Test Engineering (f/m/div)

Job description

You are convincing by the fact that you are a customer oriented team player, active driver and want to get things done. You work well under stress, are flexible and want to be employed in a demanding field of work. Then this is the right job for you! Apply now and become part of our team in Villach!

The key role of this position is the specification and development of wafer test solutions for discrete power products (Transistors, IGBTs, Diodes, SiCMOS & GaN). Part of this function is also the understanding of product test cost implication for existing and future products within the Infineon product and manufacturing test landscape.

In your new role you will:

- **Define test concepts** and perform test simulation to ensure robustness of test solution
- **Design test hardware** for automated test equipment (ATE)
- **Code/debug test programs**
- **Analyse statistical test data**
- **Implement innovative methods** to reduce test costs and to improve quality in wafer test operation environment

Profile

You remain focused on solutions, are open-minded and flexible even if under pressure, exhibit and promote awareness for quality in your area of work and share information comprehensively and effectively.

You are best equipped for this task if you have:

- A **degree from university** or university of applied science in **Electrical Engineering, Mechatronics** or a comparable educational background
- Several years of **experience in test engineering/development/lab environment**
- **Fluent English and ideally German** language skills
- Ideally some **experience in discrete power product testing** and test hardware development

This position is subject to the collective agreement for workers and employees in the electrical and electronics industry, at least employment group G (<https://www.feei.at/leistungen/informations-service/mindestlohne-und-gehalter>). The monthly salary is paid 14 times p.a. A higher payment is negotiable depending on your expertise and skills. Furthermore, Infineon offers additional employee benefits.

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

At Infineon in Villach you shape the technologies of tomorrow and work in an international environment with more than 3900 colleagues from over 70 nations. Your personal contribution will be valued and appreciated as the cornerstones of our success. And all that in beautiful surroundings which guarantee a high quality of life.

The City of Villach is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Due to its particular geographic location and the outstanding natural beauty of the region, Villach and the whole province of Carinthia have for generations been popular holiday destinations for people from all over the world. Living in Austria also has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach benefits from its status as a "small town", offering everyday living at affordable prices in an outstanding setting.
