## Senior Expert Transit Management (f/m/div)

### Job description

The world of transport logistics is your passion, both strategically and operationally? Are you enjoying the exchange and the collaboration in a worldwide team with internal and external colleagues? Are you a strong communicator who is able to play different roles and adapt very well to all counterparts? We have the right challenge for you at Infineon in Munich! Apply now to join our Global Logistics team as a Senior Expert with focus on Transit Management and working in an exciting, multinational environment

As Senior Expert Transit Management, you are responsible worldwide for strategic forwarder management and the transport route network and pro-actively drive improvements. You steer physical, informational, and monetary measures regarding dispatch, transport and receipt of goods within the Infineon Group. You will work in close cooperation with our logistics service providers as well as with the transit managers at the locations, supply chain managers from other Infineon departments, procurement, business continuity and IT.

In your new role your tasks will be:

- As **central key counterpart, worldwide coordination of global transit management of all Infineon locations**, including management and control of external transport service providers with the aim of continuously optimizing transport costs, quality, time and flexibility
- **Elaboration and global coordination of individual, requirement-based transport and delivery concepts** along Infineon's supply chain including implementation
- **Responsibility for monitoring of global volume flows and ensuring adherence to process parameters** such as, forwarder performance, transit times and costs
- **Drive improvements in the transit network** through organization and management of regular global business reviews with the transport service providers
- **Advice to the business groups, regions and locations** regarding transport solutions and process optimization
- **Professional evaluation of offers** in regular tenders for transport services in cooperation with procurement
- **Develop and implement optimal transit solutions** in the Supply Chain of global corporations
- **Support logistics projects** to ensure appropriate consideration and implementation of Transit Management relevant aspects and processes

## Why Us

### **Driving decarbonization and digitalization. Together.**

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

### **– Our Supply Chain is a Competitive Advantage for Infineon –**

At Infineon, we see our Supply Chain as a competitive advantage. By orchestrating partners, data, goods, processes, and tools related to transport and shipping, Transit Management is an essential part to ensure this competitive advantage.

### **We are on a journey to create the best Infineon for everyone.**

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the

requirements of the job posting.  
Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
