Driving decarbonization and digitalization. Together.

IT Product Owner Portfolio & Roadmap Management (f/m/div)

Job description

Join our team as an IT Product Owner, shaping the future of our Portfolio and Roadmap Management solutions! Collaborate with cross-functional teams to build and run a digital platform that will drive Infineon's digitalization journey for product portfolio and roadmap management. Working alongside enterprise architects, subject matter experts and business stakeholders, you will analyze requirements, propose innovative ideas, and design efficient and scalable systems that make a significant impact on Infineon's success!

In your new role you will:

- Act as an IT product owner and business analyst for portfolio and product road mapping solutions at Infineon
- Assume end-to-end responsibility for the application lifecycle from design to development, deployment and operations
- Work closely with business stakeholders to gather, analyze and consolidate diverse requirements and transform them into IT solutions in close collaboration with enterprise architects and subject matter experts
- Collaborate with software developers and architects to design systems that are
 efficient, effective, and scalable
- Drive delivery and operations in close cooperation with our development teams and service providers
- Manage small and medium-sized IT projects, as well as user acceptance tests

Profile

You actively look for the ideal solution and engage in professional debates with the relevant people, instead of accepting rash compromises. You concentrate your creativity and knowledge on producing results with real added value. Furthermore, you commit yourself to the results of your own team and the company as a whole.

You are best equipped for this task if you have:

- A degree in Business Informatics, Information Systems, Industrial Engineering or in a related field
- At least 3-5 years of relevant professional experience in a similar role in corporate IT or IT consulting

At a glance

Location: Munich (Germany)

Job ID: HRC0722240

Start date: Jul 01, 2024

Bari Guritno

Recruiter

- Strong methodological competence in agile software development and requirements engineering and related tools (e.g. Jira, Bitbucket, Confluence and CI/CD)
- Very good understanding and hands-on experience with modern web technologies, frameworks and IT technologies
- Good knowledge of DevOps practices and IT service management (ITIL)
- Excellent communication, collaboration and problem-solving skills with the ability to work effectively with cross-functional teams
- Knowledge of product portfolio management solutions and best practices and experience in UX Design and Usability would be a big plus
- Excellent English skills, German language skill would be a big plus

Benefits

• Munich: Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; On-site creche and kindergarden with 220 spots, open until 5:30pm; Holiday child care; On-site social counselling and works doctor; Health promotion programs; On-site gym, jogging paths, beachvolleyball, tennis & soccer court; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement; Performance bonus; Reduced price for public transport and very own S-Bahn station; Access for wheelchairs; Possibility to work remotely from abroad (EU)

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

With over 1.400 employees worldwide, Infineon **IT** is the driving power behind the Infineon's digitalization initiatives.

The Infineon Digital Agenda focuses on the Digital Customer Interface, Digital Products, Digital Services and End-to-End Process Digitalization. IT fosters customer success, utilizes cutting edge technologies and promotes new ways of working in a changing work environment. Operational excellence at benchmark cost in all services provided by IT is the foundation on which all new initiatives are built upon. Cloud Services, Applications, Platforms, Data centers, Networks, Infrastructure, and the entire R&D Computing environment are some examples of the services managed by Infineon IT. Beyond stable and reliable operations, Infineon IT strives for continuous improvement which is based on a core belief of delivering value for our the Infineon business. We play a key role in supporting the Infineon's key objectives of decarbonization and digitalization.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
