

Driving decarbonization and digitalization. Together.

Director Product Development for Bare Die & Discrete Power Devices E-Mobility (f/m/div)

Job description

Do you have the ability to communicate at different levels and take responsibility for technical challenges? Do you not only make decision but also accompany their implementation in cooperation with all relevant stakeholders? Become a part of our automotive success story as our new Director for Product Development (f/m/div)* and support us in the development of electromobility products. In this function you will be the Head of technical product development for Bare Die & Discrete Power Devices and you will have deep interaction with external customer module development and discrete application for our leading-edge products SiC, IGBT, Diodes in a strongly growing market of E-Mobility.

In your new role you will:

- **Lead team of technical experts** across multiple sites
- **Contribute to product roadmaps and take decision with significant business impact**
- **Represent the electromobility requirements** in cross division product development teams
- Be responsible for intensive **stakeholder and expectation management** for Infineon's R&D to internal departments like Technical Marketing, GIP, PSS as well as to **external customer**
- **Drive, coach and challenge new technology, package and product ideas of your team**, actively balancing risks and opportunities and driving decisions
- **Empower your team to make technical decisions** and take responsibility for their implementation
- **Enable your team to substantially contribute by innovative ideas** to the next generation of Bare Die & Discrete Product development for automotive applications
- **Mentor and expand knowledge** base of junior electrical engineers

Payment Scale: GG14

Posting Date: 12.04.2024

Profile

You can quickly establish a successful cooperation, recognize and use different areas of expertise and skills of the team members. You act as an entrepreneur, focus on results and stay aware of costs and commit yourself to the results of your own team and the company as a whole. Furthermore, you are personally committed to the customer's concerns and award them a high-priority and focus your efforts on finding solutions

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon ATV is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
