

# Driving decarbonization and digitalization. Together.

## Manager Production

### Job description

Manage and oversee manufacturing activities to ensure that production output, quality, cycle time and cost meet the business plan.

In your new role you will:

- Identify "bottleneck" equipment/area and discuss/analyze the problem in the relevant department.
- Responsible for investigating ways to reduce scrap, non-conformity, and manpower ineffectiveness.
- Accountable for managing manpower to meet the department's KPIs.
- Responsible for clarifying and communicating management directions.
- Initiate and lead productivity and cost savings projects contributing to the KPI of the company.

### Profile

You are best equipped for this task if you have:

- Bachelor's degree in Engineering course
- Minimum 10 years of relevant working experience as a Senior Engineer or Production Engineer.
- Excellent knowledge of Production Management (FIFO, LIFO, Kanban, and Lean Manufacturing Concepts) and clean room environment/protocols.
- The ability to manage a workforce size of 180–250 operators, technicians, and supervisors.
- Proficient in Tableau and Python.
- Knowledge of Business Objects is an added advantage.
- Good command of English (Speak, Read, Write).

### Why Us

**Driving decarbonization and digitalization. Together.**

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.
