

News Release/Presseinformation

KEY FIGURES FOR THE SECOND QUARTER OF 2008 FISCAL YEAR

- With plans for the ultimate disposal and resulting deconsolidation of its investment in Qimonda AG, Infineon Technologies has reclassified the assets and liabilities of Qimonda as “assets held for sale” in its condensed consolidated balance sheets, effective March 31, 2008.
- With this reclassification, the individual line items in Infineon’s condensed consolidated statements of operations, including “Revenues”, reflect Infineon’s continuing operations without Qimonda. All results relating to Qimonda are reported in the line item “Income (loss) from discontinued operations”. From now on, you will find references to “Infineon excluding Qimonda” replaced with references to “Infineon”. Similarly, the definition of EBIT will exclude Qimonda, and is now being referred to as “Infineon EBIT”.
- For the second quarter of the 2008 fiscal year, Infineon reported revenues of Euro 1.049 billion. Infineon EBIT was Euro 36 million, compared to Euro 65 million in the prior quarter. Infineon EBIT in the second quarter included net charges of Euro 8 million, mainly in connection with restructuring. Infineon EBIT in the previous quarter included a net gain of Euro 11 million. Net income from continuing operations before extraordinary loss was Euro 19 million or Euro 0.03 per share (basic and diluted).
- The net loss from discontinued operations was Euro 1.390 billion for the second quarter. This loss included Infineon’s share in Qimonda’s net loss of Euro 482 million, as well as charges of Euro 1.004 billion from the write-down of the carrying value of Infineon’s interest in Qimonda to its estimated fair value less costs to sell, following its reclassification as held for sale. Basic and diluted loss per share from discontinued operations was Euro 1.85.
- For the second quarter, Infineon reported group net loss of Euro 1.371 billion, and basic and diluted loss per share of Euro 1.82.

in Euro million	3 months	year-on-year +/- in %	3 months	sequential +/- in %	3 months
	ended Mar 31, 07		ended Dec 31, 07		ended Mar 31, 08
Revenues	978	7%	1,090	(4%)	1,049
Infineon EBIT	(29)	+++	65	(45%)	36
Income (loss) from continuing operations	(25)	+++	45	(58%)	19
Income (loss) from discontinued operation, net of tax	49	---	(441)	---	(1,390)
Net loss	(11)	---	(396)	---	(1,371)
Basic and diluted earnings (loss) per share from continuing operations	(0.04)	+++	0.06	(50%)	0.03
Basic and diluted earnings (loss) per share from discontinued operations	0.07	---	(0.59)	---	(1.85)
Basic and diluted earnings (loss) per share from extraordinary loss	(0.04)	+++	-	+++	-
Basic and diluted loss per share (in Euro)	(0.01)	---	(0.53)	---	(1.82)

Infineon EBIT in the second quarter of the 2008 fiscal year included net charges of Euro 8 million, mainly in connection with restructuring. Infineon EBIT in the prior quarter included a net gain of Euro 11 million, reflecting a gain of Euro 28 million from the sale of part of the company’s interest in its high-power bipolar business, which was partly offset by charges of Euro 17 million, mostly reflecting a write-off of acquired in-process research & development of Euro 14 million relating to the mobile phone business acquired from LSI.

OUTLOOK FOR THIRD QUARTER AND 2008 FISCAL YEAR

- Infineon expects revenues for the third quarter to be flat to down slightly relative to the second quarter. Infineon EBIT excluding net gains or charges is expected to decline from the prior quarter, but remain positive, with a low single-digit EBIT margin. In the third quarter, Infineon expects to record a gain of approximately Euro 40 million from the sale of the company's hard disk drive business to LSI.
- Revenues for the third quarter in the Automotive, Industrial & Multimarket segment are expected to decline by a low single-digit percentage sequentially, with segment EBIT margin of 8.5 to 9.5 percent excluding net gains or charges. In addition, Infineon expects to record a gain of approximately Euro 40 million from the sale of the company's hard disk drive business to LSI. Revenues in the Communication Solutions segment are expected to increase by a mid to high single-digit percentage compared to the prior quarter, with segment EBIT of approximately negative Euro 25 million excluding net gains or charges.
- For the full year, Infineon expects revenues to grow by a high single-digit percentage and Infineon EBIT, excluding net gains or charges, to be positive, with low to mid single-digit EBIT margin. In the Automotive, Industrial & Multimarket segment, revenues and segment EBIT, excluding net gains or charges, are both expected to decline slightly from 2007 fiscal year levels. In Communication Solutions, Infineon expects revenue growth of 25 to 30 percent from 2007 fiscal year levels with low to mid single-digit negative segment EBIT margin, excluding net gains or charges.

News Release / Presseinformation

Infineon reports results for the second quarter of 2008 fiscal year

Neubiberg, Germany – April 23, 2008 – Infineon Technologies AG (FSE/NYSE:IFX) today reported results for the second quarter of the 2008 fiscal year, ended March 31, 2008.

As of March 31, 2008, the financial reports of Infineon will focus on the ongoing operations of the company while at the same time setting the foundation for the comparability of its performance going forward. The assets and liabilities of Qimonda have been reclassified as held for sale in the condensed consolidated balance sheets, and the individual line items in the condensed consolidated statements of operations reflect the results of Infineon's segments other than Qimonda. The results of operations of Qimonda are reported in one line item titled "Income (loss) from discontinued operations". In addition, earnings per share as well as the statements of cash flows differentiate between "continuing" and "discontinued" operations. Following this reclassification, the investment in Qimonda has been reduced to its current fair value less costs to sale, resulting in a write-down of Euro 1.004 billion, which was recorded in "Income (loss) from discontinued operations" in the second quarter of the current fiscal year.

Infineon's revenues in the second quarter of the 2008 fiscal year were Euro 1.049 billion, down four percent sequentially and up seven percent year-over-year. The sequential decline reflects primarily negative revenue seasonality in the Communication Solutions segment. Excluding effects from currency fluctuations, primarily between the U.S. dollar and the Euro, and acquisitions and divestitures, revenues declined two percent sequentially and rose ten percent year-over-year.

Infineon EBIT was Euro 36 million in the second quarter, down from Euro 65 million in the prior quarter. Infineon EBIT in the second quarter included net charges of Euro 8 million, mainly in connection with restructuring, and Euro 5 million for the amortization of acquisition-related intangible assets related mainly to the business acquired from LSI. Infineon EBIT in the first quarter included a net gain of Euro 11 million, and Euro 9 million of such amortization expenses. For additional detail on net gains and charges included in Infineon EBIT, please see the table on page 9 of this release.

Net income from continuing operations for the second quarter was Euro 19 million, translating into basic and diluted earnings per share of Euro 0.03. For the first quarter, net income from continuing operations was Euro 45 million, basic and diluted earnings per share were Euro 0.06.

The net loss from discontinued operations was Euro 1.390 billion for the second quarter. This loss included Infineon's share in Qimonda's net loss of Euro 482 million, as well as a charge of Euro 1.004 billion from the write-down of the carrying value of Infineon's interest in Qimonda to its estimated fair value. Basic and diluted loss per share from discontinued operations was Euro 1.85.

For the second quarter, Infineon reported group net loss of Euro 1.371 billion, and basic and diluted loss per share of Euro 1.82.

Infineon's outlook for third quarter of 2008 fiscal year

Although Infineon has hedged a significant portion of the cash flow impact of the weakening exchange rate of the U.S. dollar against the Euro for the 2008 fiscal year, the exchange rate development is still negatively impacting the top-line. For the third quarter of the 2008 fiscal year, Infineon expects revenues to be flat to down slightly compared to the second quarter. The company anticipates Infineon EBIT, excluding net gains or charges, to decline from the prior quarter's level, but to remain positive, with low single-digit Infineon EBIT margin. In the third quarter, Infineon expects to record a gain of approximately Euro 40 million from the sale of the company's hard disk drive (HDD) business to LSI.

Infineon's outlook for 2008 fiscal year

For the full year, Infineon maintains its previously announced outlook for its continuing operations. In the Automotive, Industrial & Multimarket segment, revenues and EBIT excluding net gains or charges are both expected to decline slightly from 2007 fiscal year levels. In the Communication Solutions segment, revenues are anticipated to increase 25 to 30 percent, with low to mid single-digit negative EBIT margin excluding net gains or charges.

Infineon currently expects revenues to increase by a high single-digit percentage year-on-year. Infineon EBIT in the 2008 fiscal year, excluding net gains or charges, is anticipated to be positive with low to mid single-digit Infineon EBIT margin.

“In the second quarter, we took a big step forward in our preparation for the ultimate disposal and resulting deconsolidation of our investment in Qimonda resulting in the re-classification as assets held for sale. In our ongoing operations, we made solid year-over-year progress both in terms of revenue and Infineon EBIT. That progress was achieved despite a materially adverse development in the U.S. dollar-Euro exchange rate”, said Dr. Wolfgang Ziebart, President and CEO of Infineon Technologies AG. “Last quarter’s severe fall of the U.S. dollar against the Euro from about 1.45 to the current level of about 1.60, should it be sustained throughout the entire 2009 fiscal year, would negatively impact Infineon EBIT for next year by about Euro 120 million, based on our current revenue projections. Reaching ten percent Infineon EBIT margin under such circumstances would not be possible. Against this background, we have strongly accelerated all margin improvement measures that we are implementing across the company. We therefore see the potential, despite the significant currency hit, to maintain EBIT margins in the Automotive, Industrial & Multimarket segment at a high level and to achieve positive EBIT in our Communication Solutions segment next year, excluding net gains or charges.”

Additional details concerning the outlook can be found in the segments’ sections below.

Segments’ second quarter performance and outlook

Automotive, Industrial & Multimarket (AIM)

In the second quarter of the 2008 fiscal year, the Automotive, Industrial & Multimarket segment reported revenues of Euro 741 million, broadly unchanged compared to the prior quarter, due to the usual seasonal pattern, and unchanged year-over-year.

 investor.relations@infineon.com

Excluding the effects of currency fluctuations, primarily between the U.S. dollar and the Euro, and acquisitions and divestitures, segment revenues increased nine percent year-over-year and grew one percent sequentially. Segment EBIT was Euro 69 million compared to Euro 93 million in the first quarter. Net gains or charges included in the segment EBIT for the second quarter were negligible. Included in the first quarter segment EBIT was a gain of Euro 28 million from the sale of part of the company's interest in its high-power bipolar business.

Revenues and EBIT in the automotive business increased compared to the prior quarter, despite ongoing weakness in demand from U.S. car manufacturers. In the industrial & multimarket business, revenues and EBIT decreased, as expected, due to the usual seasonal pattern in the consumer, computing and telecom markets. Demand for high-power products remained strong. The results of the security & ASICs business remained broadly unchanged compared to the first quarter, mainly due to continued strong demand in the chip card and security business.

Automotive, Industrial & Multimarket's outlook for third quarter of 2008 fiscal year

In the third quarter of the 2008 fiscal year, Infineon expects revenues of its Automotive, Industrial & Multimarket segment to decline by a low single-digit percentage compared to the second quarter. The expected decline can be attributed predominantly to the ongoing weakening of the U.S. dollar against the Euro and the expected deconsolidation of the company's HDD business. Segment EBIT margin is expected to be in the range of 8.5 to 9.5 percent, excluding net gains or charges. In addition, Infineon expects to record a gain of approximately Euro 40 million from the sale of the HDD business to LSI.

Revenues in the segment's automotive business are expected to remain broadly unchanged compared to the second quarter. Sales in the industrial & multimarket business are anticipated to be about flat. Results in the security & ASICs business are anticipated to decline compared to the prior quarter, largely due to the deconsolidation of the HDD business following its sale to LSI. The transaction is expected to close in the third quarter. In addition, we expect some normalization in demand for chip card ICs.

Communication Solutions (COM)

In the second quarter of the 2008 fiscal year, revenues in the Communication Solutions segment were Euro 302 million, down 15 percent compared to the prior quarter and up 27 percent year-over-year. Excluding the effects of currency fluctuations, primarily between the U.S. dollar and the Euro, and the contributions from the mobile phone business acquired from LSI and the DSL CPE activities acquired from Texas Instruments, segment revenues increased 10 percent year-over-year and decreased 15 percent sequentially. Segment EBIT for the second quarter declined to negative Euro 29 million, compared to negative Euro 11 million in the prior quarter, following the revenue decline. Included in the segment EBIT for the second quarter was amortization of acquired intangible assets of Euro 5 million relating mainly to the mobile phone business acquired from LSI. Included in the segment EBIT for the first quarter was a write-off of Euro 14 million for acquired in-process R&D in connection with the acquisition of the mobile phone business of LSI. Also included in the segment EBIT for the first quarter was amortization of acquired intangible assets of Euro 9 million relating mainly to the mobile phone business acquired from LSI.

In the wireless business, revenues decreased strongly, as expected, driven mainly by typical wireless seasonality and reduced volumes in certain mobile phone projects. As anticipated, revenues in the broadband business stabilized on the low level of the prior quarter.

Communication Solutions' outlook for third quarter of 2008 fiscal year

In the third quarter of the 2008 fiscal year, revenues in the Communication Solutions segment are expected to increase by a mid to high single-digit percentage compared to the prior quarter. This increase reflects mainly the scheduled production ramp-ups of the company's new HSDPA and EDGE mobile platform solutions.

The broadband business is anticipated to remain broadly unchanged compared to the second quarter. Segment EBIT is expected to be approximately negative Euro 25 million, excluding net gains or charges.

Qimonda

In preparation for ultimate disposal and resulting deconsolidation of its investment in Qimonda AG, Infineon has reclassified the assets and liabilities of Qimonda as held for sale in its condensed consolidated balance sheets effective March 31, 2008. With this decision, the individual line items in the condensed consolidated statements of operations on page 8 of this release reflect Infineon's continuing operations without Qimonda. All results relating to Qimonda are reported in the line item "Income (loss) from discontinued operations".

For the second quarter, the net loss from discontinued operations was Euro 1.390 billion. This loss included Infineon's share in Qimonda's net loss of Euro 482 million, as well as charges of Euro 1.004 billion from its write-down of the Infineon's interest in Qimonda to its estimated fair value, following the reclassification as held for sale. Basic and diluted loss per share from discontinued operations was Euro 1.85 for the second quarter. Infineon's beneficial ownership interest in Qimonda as of March 31, 2008 was 77.5 percent.

Other Operating Segments / Corporate and Eliminations

Revenues in Euro million	3 months ended

Other Operating Segments / Corporate and Elimination's outlook for third quarter of 2008 fiscal year

In the third quarter, Infineon expects revenues in Other Operating Segments to decline compared to the prior quarter as shipments of wafers out of Infineon's 200-millimeter wafer facility to Qimonda will come to an end during the quarter. EBIT excluding net gains or charges for Other Operating Segments and Corporate and Eliminations combined is anticipated to be approximately negative Euro 20 million.

Major business highlights of Infineon's segments in the second quarter of the 2008 fiscal year can be found in this document after the financial tables.

All figures are preliminary and unaudited.

Analyst and press telephone conferences

Infineon Technologies AG will conduct a telephone conference (in English only) with analysts and investors on April 23, 2008, at 10:00 a.m. Central European Summer Time (CEST), 4:00 a.m. Eastern Daylight Time (U.S. EDT), to discuss operating performance during the second quarter of the 2008 fiscal year. In addition, the Infineon Management Board will host a telephone conference with the media at 11:30 a.m. (CEST), 5:30 a.m. (U.S. EDT). It can be followed in German and English over the Internet. Both conferences will be available live and for download on the Infineon web site at

<http://corporate.infineon.com>.

Infineon EBIT

Infineon EBIT is defined as earnings (loss) before income (loss) from discontinued operation, net of tax, interest and taxes. The Company's management uses Infineon EBIT, among other measures, to establish budgets and operational goals, to manage the Company's business and to evaluate its performance. The Company reports Infineon EBIT information because it believes that it provides investors with meaningful information about the operating performance of the Company and especially about the performance of its separate operating segments. Because many operating decisions, such as allocations of resources to individual projects, are made on a basis for which the effects of financing the overall business and of taxation are of marginal relevance, management finds a metric that excludes the effects of interest on financing and tax expense useful. In addition, in measuring operating performance, particularly for the purpose of making internal decisions, such as those relating to personnel matters, it is useful for management to consider a measure that excludes items over which the individuals being evaluated have minimal control, such as enterprise-level taxation and financing.

Infineon EBIT is determined as follows from the condensed consolidated statements of operations, without adjustment to the US GAAP amounts presented:

in Euro million	3 months ended			6 months ended	
	Mar 31, 07	Dec 31, 07	Mar 31, 08	Mar 31, 07	Mar 31, 08

Gross and Net Cash Position*

Infineon defines gross cash position as cash and cash equivalents and marketable securities, and net cash position as gross cash position less short and long-term debt. Since Infineon holds a substantial portion of its available monetary resources in the form of readily marketable securities, which for US GAAP purposes are not considered to be "cash", it reports its gross and net cash positions to provide investors with an understanding of the Company's overall liquidity. The gross and net cash position is determined as follows from the condensed consolidated balance sheets, without adjustment to the US GAAP amounts presented:

* Includes only amounts from continuing operations.

in Euro million	Mar 31, 07	Dec 31, 07	Mar 31, 08
Cash and cash equivalents	629	501	227
Marketable securities	242	531	623
Gross Cash Position	871	1,032	850
Less: short-term debt	231	261	188
long-term debt	1,019	1,237	1,191
Net Cash Position	(379)	(466)	(529)

Free Cash Flow*

Infineon defines free cash flow as cash from operating and investing activities excluding purchases or sales of marketable securities. Since Infineon holds a substantial portion of its available monetary resources in the form of readily marketable securities, and operates in a capital intensive industry, it reports free cash flow to provide investors with a measure that can be used to evaluate changes in liquidity after taking capital expenditures into account. Free cash flow is not intended to represent the residual cash flow available for discretionary expenditures, since debt service requirements or other non-discretionary expenditures are not deducted. The free cash flow is determined as follows from the condensed consolidated cash flow statements, without adjustment to the US GAAP amounts presented:

* Includes only amounts from continuing operations.

in Euro million	3 months ended			6 months ended	
	Mar 31, 07	Dec 31, 07	Mar 31, 08	Mar 31, 07	Mar 31, 08

Infineon business highlights for the second quarter of the 2008 fiscal year

- **AIM:** BMW M GmbH selected Infineon as its semiconductor partner to develop the new engine control unit for the next BMW M series of cars. Infineon will integrate its 32-bit AUDO FUTURE microcontroller chips into the system and provide technical support. The TriCore-based AUDO FUTURE microcontrollers deliver market-leading real-time performance that helps to handle next-generation emission standards, particularly EURO5 and EURO6.
- **AIM:** Infineon again received prestigious Best Supplier Awards from several global players, honoring the company's work in the supply of products and services. Toyota's Hirose plant, for example, awarded its product quality excellence prize to Infineon in 2007. Infineon had won the award also in 2006.

Energy efficiency

- **AIM:** The company achieved a major design win with its crankshaft sensor at a major car manufacturer. This sensor offers direction detection for a start/stop application to diesel engines.
- **AIM:** Infineon released two product families for the growing market of AC/DC and DC/DC power supplies, which is expected to increase 4.9 percent on average to a total market size of U.S. dollar 20.9 billion in 2012 (IMS Research, October 2007). The OptiMOS 3 N-Channel MOSFET helps to reduce power losses by up to 30 percent for power supplies in consumer, industry- and telecommunication applications. The CoolMOS 900-V-Superjunction-MOSFETs are designed for applications like LCD-TVs, solar power generators, „Silverbox“-PC power supplies, and lighting systems. Their on-state resistance is best in class and up to 75 percent lower than using conventional 900 V MOSFETs in industry standard packages
- **AIM:** Infineon had design wins for its cost-efficient 16-bit and 32-bit powertrain microcontrollers for low-end gasoline and diesel applications in the emerging car markets in Asia. Despite stringent requirements to reduce fuel consumption and emission, Infineon helps to meet the cost constraints of entry-level cars with consumer price demands of approximately U.S. dollar 2,500.

Communications

- **COM:** The Korean mobile phone manufacturer Samsung Electronics, Inc. chose Infineon's HSDPA platform XMM™6080 for its new family of HEDGE mobile handsets. The Infineon platform includes the HSDPA/EDGE baseband, power management, and single-chip 3.5G RF transceiver and is complemented by Infineon's protocol

stack for HEDGE phones. Infineon has already started volume shipments of its HSDPA platform. The Samsung HEDGE phones with the XMM™6080 are expected to be available in the second quarter of the 2008 calendar year.

- COM: Infineon achieved a design win for its HSDPA platform XMM™6080 and its EDGE platform XMM™2080 at major mobile phone customers. Ramp-up of both design wins is scheduled for the end of the 2008 calendar year.
- COM: Infineon sampled its 65 nanometer GSM/GPRS single-chip solution X-GOLD™113 and EDGE single-chip solution X-GOLD™213. Both chips integrate the baseband, RF transceiver, power management unit, and FM radio in one single die.
- COM: As announced on the occasion of the 2008 Mobile World Congress, the company achieved a design win for its RF transceiver SMARTi UE+ at another major mobile phone customer.
- COM: Infineon achieved several design wins for its GPS single-chip solution Hammerhead 2 at a major mobile phone customer.
- AIM: Infineon began volume shipments of the world's first RF switches manufactured in a CMOS-based process on silicon wafers, offering the equivalent performance of RF switches manufactured in Gallium Arsenide (GaAs) process technology. RF switches are expected to replace today's PIN diodes in the next five years with an estimated market total of up to 4 billion pieces in 2011. Infineon's technological breakthrough allows RF switches that are cost efficient and up to 60 percent smaller than the smallest GaAs RF switch.

Security

- AIM: With its SLM 76 family of security microcontrollers, Infineon entered the machine-to-machine (M2M) communication market. This market is predicted to grow at a rate of around 35 percent a year to a total of approximately 70 million pieces in 2011. The SLM 76 family is designed for use in utility monitoring, car telematics, fleet management in freight forwarding and rental car companies and vending machines (stock level checks). Currently primarily centering on automotive telematics and metering, leading smart card manufacturers have started to develop products based on the SLM 76 or are conducting initial field tests.
- AIM: Infineon began to supply its contactless/dual-interface security microcontrollers to public transportation projects in China. China's market for transportation cards is estimated to 20 to 30 million cards annually.

About Infineon

Infineon Technologies AG, Neubiberg, Germany, offers semiconductor and system solutions addressing three central challenges to modern society: energy efficiency, communications, and security. In the 2007 fiscal year (ending September), the company reported sales of Euro 7.7 billion (including Qimonda sales of Euro 3.6 billion) with approximately 43,000 employees worldwide (including approximately 13,500 Qimonda employees). With a global presence, Infineon operates through its subsidiaries in the U.S. from Milpitas, CA, in the Asia-Pacific region from Singapore, and in Japan from Tokyo. Infineon is listed on the Frankfurt Stock Exchange and on the New York Stock Exchange (ticker symbol: IFX). Infineon currently holds a 77.5 percent equity interest in Qimonda AG, a leading supplier of DRAM memory products. Qimonda is separately listed on the New York Stock Exchange under the ticker symbol "QI".

DISCLAIMER

This discussion includes forward-looking statements about our future business. These forward-looking statements include statements relating to future developments in the world semiconductor market, including the market for memory products, Infineon's future growth, the benefits of research and development alliances and activities, our planned levels of future investment in the expansion and modernization of our production capacity, the introduction of new technology at our facilities, the continuing transitioning of our production processes to smaller structure sizes, cost savings related to such transitioning and other initiatives, our successful development of technology based on industry standards, our ability to offer commercially viable products based on our technology, our ability to achieve our cost savings and growth targets, and any potential disposal of our interest in Qimonda. These forward-looking statements are subject to a number of uncertainties, including trends in demand and prices for semiconductors generally and for our products in particular, the success of our development efforts, both alone and with our partners, the success of our efforts to introduce new production processes at our facilities and the actions of our competitors, the availability of funds for planned expansion efforts, the outcome of antitrust investigations and litigation matters, the success of any corporate activities we may undertake with respect to our interest in Qimonda, as well as the other factors mentioned herein and those described in the "Risk Factors" section of the annual report of Infineon on Form 20-F filed with the U.S. Securities and Exchange Commission on December 7, 2007. As a result, our actual results could differ materially from those contained in the forward-looking statements. Infineon does not intend or assume any obligation to update or revise these forward-looking statements in light of developments which differ from those anticipated.
