

Press Release

Infineon completes 2013 fiscal year with a strong fourth quarter

- **Q4 FY2013: Revenue at €1,053 million as expected; Segment Result of €148 million, Segment Result Margin of 14.1 percent; excluding non-recurring items, Segment Result Margin would have been approximately 13 percent thus in line with expectations**
- **Outlook for Q1 FY2014: Revenue between €960 million and €1 billion; Segment Result Margin between 8 and 10 percent**
- **Outlook for FY2014: Revenue increase between 7 and 11 percent; Segment Result Margin between 11 and 14 percent**
- **Management Board proposes dividend of €0.12 per share for 2013 fiscal year**

Neubiberg, Germany – November 12, 2013 Infineon Technologies AG today is reporting results for the fourth quarter and the 2013 fiscal year, both ended September 30, 2013.

€in million	3 months ended	sequential	3 months ended	year-on-year	3 months ended

¹ The calculation for earnings per share is based on unrounded figures.

"In the fourth quarter revenue, result and margin increased for the third time in succession. The 2013 fiscal year has therefore turned out to be better than expected one year ago", stated Dr. Reinhard Ploss, CEO of Infineon Technologies AG. "We reacted quickly to market developments. Thanks to forward-looking cost management,

Infineon remained profitable even when demand was at its lowest. When the market picked up again, we were able to ramp up production quickly and gain market share."

Group earnings in fourth quarter of 2013 fiscal year

Fourth-quarter revenue of the Infineon Group increased by 3 percent to €1,053 million and was thus in line with the outlook at the beginning of the quarter. This positive development was primarily driven by the Industrial Power Control (IPC) and Chip Card & Security (CCS) segments. Revenue of the Power Management & Multimarket (PMM) segment increased slightly, while that of the Automotive (ATV) segment decreased marginally.

Segment Result increased by 26 percent to €148 million, compared to €117 million achieved in the previous quarter. The Segment Result Margin in the fourth quarter was 14.1 percent, up from the 11.4 percent recorded in the preceding quarter. The Segment Result for the fourth quarter of the fiscal year did, however, contain the impact of certain non-recurring items. Most significant was the positive effect from a reduction in risk allowances for inventories, which was only partly offset by higher expenses for variable compensation. Excluding non-recurring items, the Segment Result Margin would have been in line with the level of approximately 13 percent forecasted at the beginning of the quarter.

Income from continuing operations in the fourth quarter amounted to €139 million, compared with €82 million in the previous quarter. The income from discontinued operations improved quarter-on-quarter from negative €5 million to positive €3 million.

Net income increased from €77 million in the third quarter to €142 million in the fourth quarter of the 2013 fiscal year. Earnings per share (basic and diluted) improved from €0.07 to €0.13.

Investments – which Infineon defines as the sum of purchases of property, plant and equipment, purchases of intangible assets and capitalized development cost – increased from €71 million the third quarter to €155 million in the fourth quarters of the 2013 fiscal year. Depreciation and amortization amounted to €119 million in the fourth quarter, compared to €115 million in the third quarter.

Free cash flow¹ from continuing operations saw a continuation of the upward trend in recent quarters and increased to €156 million. The figure for the third quarter had been €135 million.

The gross cash position improved from €2.137 billion at the end of June 2013 to €2.286 billion at September 30, 2013. The net cash position at the end of the fourth

¹For definitions and the calculation of free cash flow and of gross and net cash position, please see page 12.

quarter was €1.983 billion, compared to €1.832 billion at the end of the preceding quarter.

Group result for the 2013 fiscal year

Infineon recorded Group revenue of €3,843 million for the full year, compared to the previous year's figure of €3,904 million. The decrease was therefore only 2 percent, reflecting an outcome for the 2013 fiscal year that was better than expected in autumn 2012. From the second quarter onwards, demand picked up at a significantly faster pace than expected, which more than compensated for the negative impact of a weaker-than-budgeted exchange rate of the US dollar against the euro (average of 1.31 compared to the budgeted rate of 1.25).

Group revenue excluding Other Operating Segments and Corporate and Eliminations was 1 percent higher than in the previous fiscal year, with revenue increases in the ATV, PMM and CCS segments more than offsetting the decrease in the IPC segment. The biggest increase (6 percent) was recorded by the PMM segment, which benefited from rising demand for mobile devices, such as smartphones and tablets. The ATV segment achieved a 3 percent increase in revenue, influenced by still weak automobile markets in Europe which was more than offset by good sales figures in the USA and China. The demand for German premium-cars remained strong. Revenue grew by 1 percent in the CCS segment. IPC's revenue dropped by 11 percent compared to the 2012 fiscal year, mostly reflecting weak worldwide demand for capital goods.

The reported decrease in total Group revenue was primarily due to the scheduled reduction in revenue generated by Other Operating Segments. The phase out of deliveries of products and services to the previously sold Wireline Communications and Wireless mobile phone businesses caused revenue to decrease by €99 million compared to the previous year.

Segment Result for the 2013 fiscal year amounted to €377 million, compared to the previous year's figure of €527 million, and the Segment Result Margin fell year-on-year from 13.5 percent to 9.8 percent. The decrease in Segment Result is attributable primarily to the 13 percent quarter-on-quarter reduction in revenue recorded in the first quarter of the 2013 fiscal year. Nonetheless Infineon remained solidly profitable in the first quarter with a Segment Result Margin of 5.2 percent. Subsequently, Infineon experienced revenue growth of approximately 24 percent from the first to the fourth quarter, with the Segment Result Margin rising to 14.1 percent.

In line with the change in Segment Result, Group income fell from €427 million in the 2012 fiscal year to €272 million in the 2013 fiscal year. Earnings per share amounted to

investor.relations@infineon.com

€0.25 (basic and diluted), compared to €0.40 (basic) and €0.39 (diluted) in the previous fiscal year.

Free cash flow recovered from a negative amount of €219 million in the 2012 fiscal year to a positive amount of €235 million in the 2013 fiscal year, with lower investments having a positive impact.

The gross cash position increased marginally, finishing the fiscal year at €2.286 billion compared to €2.235 billion one year earlier. The net cash position increased over the same period from €1.940 billion to €1.983 billion.

Dividend for the 2013 fiscal year

The Management Board will propose the payment of an unchanged dividend of €0.12 per share for the 2013 fiscal year. This proposal is based on a policy of offering an appropriate participation in growing earnings via the dividend to shareholders. At the same time, Infineon is intending to at least maintain the dividend at a constant level, even in times of flat or declining earnings or negative free cash flows.

Outlook for the first quarter of 2014 fiscal year

Due to the seasonal decline in demand towards the end of the calendar year, Infineon forecasts that revenue will decrease to between €960 million and €1 billion in the first quarter of the 2014 fiscal year, with quarter-on-quarter decreases expected in all four segments. In percentage terms, the decrease is likely to be significantly more pronounced for the PMM and CCS segments than for the ATV and IPC segments. In line with the expected decline in revenue, the Segment Result Margin is forecast to decrease to between 8 to 10 percent.

Outlook for the 2014 fiscal year

For the 2014 fiscal year, based on an assumed exchange rate of the US dollar against the euro of 1.35, Infineon forecasts an increase in revenue of between 7 and 11 percent compared to the previous year and a Segment Result Margin of between 11 and 14 percent.

The expected increase in revenue for the IPC segment should be well above the average for the Group. The growth rates for the PMM and CCS segments are forecast to be roughly in line with the expected average. The ATV segment is likely to grow at a slightly lower rate than the Group average. Revenue generated by Other Operating Segments has decreased continuously in each of the last two fiscal years and only

amounted to €26 million in the 2013 fiscal year. The figure for the 2014 fiscal year is expected to be similar or slightly lower.

In the light of the high levels of capacity utilization seen towards the end of the 2013 fiscal year, expected changes in the production mix and continued expansion of 200-millimeter and 300-millimeter thin wafer capacities, Infineon is planning investments of approximately €650 million for the 2014 fiscal year. Depreciation and amortization will continue to increase in the 2014 fiscal year and amount to €500 million or slightly above. Free cash flow in the 2014 fiscal year should be at least at a similar level to that achieved in the 2013 fiscal year.

At €455 million, fourth-quarter revenue of the ATV segment was virtually unchanged from the preceding quarter's figure of €459 million. Revenues during the summer months remained at a high level in what would normally be expected to be a seasonally weaker quarter. Segment Result improved from €52 million in the third quarter of the 2013 fiscal year to €57 million in the fourth quarter, while the Segment Result Margin improved from 11.3 percent to 12.5 percent.

The performance of the IPC segment continued to improve in the fourth quarter of the 2013 fiscal year, with revenue up 14 percent quarter-on-quarter from €173 million to

€197 million. Increases were recorded both for IGBT chips and for IGBT modules. Demand increased in all applications, in particular for renewable energy and industrial drives. Segment Result increased from €13 million in the third quarter to €33 million in the fourth quarter. Segment Result Margin increased from 7.5 percent to 16.8 percent.

PMM segment revenue increased slightly quarter-on-quarter by 2 percent from €266 million to €271 million. Business in most application areas was more or less flat, while revenues from the sale of products for smartphones and power supplies increased slightly compared to the preceding quarter. Segment Result increased by 7 percent from €46 million in the third quarter to €49 million in the fourth quarter. The Segment Result Margin improved quarter-on-quarter from 17.3 percent to 18.1 percent.

Revenue of the CCS segment increased from €119 million in the third quarter to €129 million in the fourth quarter of the 2013 fiscal year. This 8 percent increase was the result of increased demand in the areas of authentication, government ID and payment. Segment Result increased from €10 million in the third quarter to €12 million in the fourth quarter of the 2013 fiscal year, while the Segment Result Margin increased from 8.4 percent to 9.3 percent.

- Nov 18, 2014* Earnings Release for the Fourth Quarter and Full 2014 Fiscal Year

About Infineon

Infineon Technologies AG, Neubiberg, Germany, offers semiconductor and system solutions addressing three central challenges to modern society: energy efficiency, mobility, and security. In the 2013 fiscal year (ending September 30), the Company reported sales of €3.84 billion with around 26,700 employees worldwide. Infineon is listed on the Frankfurt Stock Exchange (ticker symbol: IFX) and in the USA on the over-the-counter market OTCQX International Premier (ticker symbol: IFNNY).

Consolidated Statements of Cash Flows

Gross and Net Cash Position

Infineon defines gross cash position as cash and cash equivalents and financial investments, and net cash position as gross cash position less short-term debt and long-term debt. Since Infineon holds some of its liquid funds in the form of financial investments, which for IFRS purposes are not considered to be "cash and cash equivalents", it reports its gross and net cash positions to provide investors with an understanding of the Company's liquidity. The gross and net cash position is derived as follows from the corresponding amounts in the consolidated statement of financial position:

in euro million	Sep 30, 13	Jun 30, 13	Sep 30, 12
Cash and cash equivalents	527	437	425
Financial investments	1,759	1,700	1,810
Gross cash position	2,286	2,137	2,235
Less:			
Short-term debt and current maturities of long-term debt	134	139	55
Long-term debt	169	166	240
Net cash position	1,983	1,832	1,940

Free Cash Flow

Infineon defines free cash flow as cash flow from operating and investing activities from continuing operations excluding purchases or sales of financial investments. The presentation of free cash flow provides useful information to investors because this measure gives an indication of the cash-generating ability of Infineon. Free cash flow is an additional measure, since Infineon holds a portion of its liquid resources in form of financial investments and it eliminates changes of financial investments from the cash generated from Infineon's business. Free cash flow is not intended to represent the residual cash flow available for discretionary expenditures, since dividends, debt service requirements or other non-discretionary expenditures are not deducted. Free cash flow includes only amounts from continuing operations, and is determined as follows from the consolidated statement of cash flows:

in euro million	3 months ended			12 months ended	
	Sep 30, 13	Jun 30, 13	Sep 30, 12	Sep 30, 13	Sep 30, 12
Net cash provided by operating activities from continuing operations	309	205	291	610	667
Net cash used in investing activities from continuing operations	(213)	(165)	(344)	(328)	(1,013)
Purchases (Proceeds from sales) of financial investments, net	60	95	100	(47)	127
Free Cash Flow from continuing operations	156	135	47	235	(219)
