AURIX™ Configuration Studio (ACS)

Configure smarter. Build faster. Move beyond ADS.

ACS is an upgraded, free-of-charge, Eclipse-based IDE with graphical configuration, automated hardware resource management and code generation for AURIX™ development. More than an evolution of ADS: Think of ACS as your Swiss army knife for tackling a wide range of development tasks.

What's new in ACS?

1. **TC3x + TC4x**
   AURIX™ device support
2. **Multi-architecture**
   PPU and CDSP projects
3. **Import from ADS**
   Bring in ADS code examples
4. **60+ more APPs**
   Broader ready-to-use catalog examples

Why make the switch from AURIX™ Development Studio (ADS)?

ACS is the forward-looking choice for your AURIX™ projects.

	AURIX™ Development Studio (ADS)		AURIX™ Configuration Studio (ACS)
Device path	TC2x + TC3x support	›	**TC3x + TC4x support**
Project scope	Legacy single-architecture workflow	›	**Multi-architecture incl. PPU + CDSP**
Migration	Existing ADS code examples	›	**Import ADS examples into ACS**
Configuration	Code-centric setup, limited graphical interface	›	**Enhanced graphical APPs + automatic resource assignment**
Included ecosystem	Established ADS offering and codes	›	**60+ more APPs + updated companion tools**

*Disclaimer: ADS final update was delivered in September 2026. Further updates will only be added to ACS.

Make the switch today.

Download AURIX™ Configuration Studio from the Infineon Development Center.
