PRODUCT BRIEF

IRHYS9A97034CMEVAL1

Inrush current limiter evaluation board using R9 P-channel MOSFET

IRHYS9A97034EVAL1 is an evaluation board to help evaluate radiation hardened (rad hard) R9 P-channel MOSFETs in inrush current limiting applications. IRHYS9A97034EVAL1 features IRHYS9A97034CM which is a 60 V, 30 A R9 P-channel MOSFET in TO-257AA low ohmic package. The board also features IRHLUB770Z4 which is a 60 V, 0.8A, R7, logic-level, rad hard N-channel MOSFET.

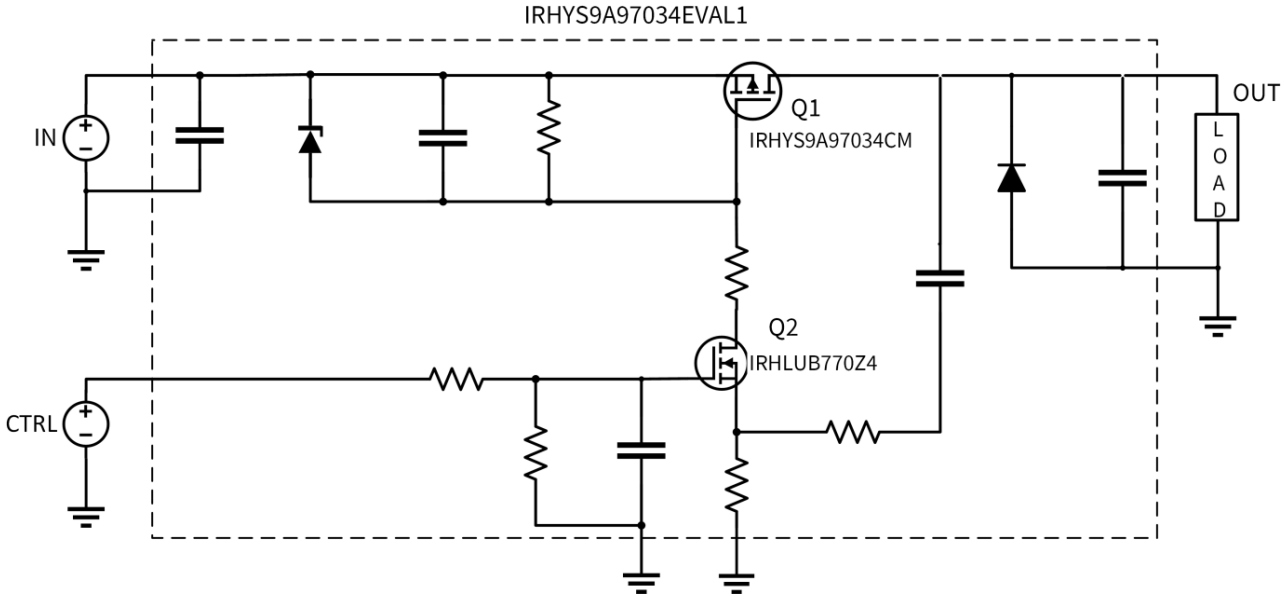

This evaluation board is designed to help the user evaluate P-channel MOSFETs in TO-257AA package in an inrush current limiter circuit configuration. Passive components on the board can be adjusted to change inrush current peak and/or charging time.

Visit www.infineon.com/IRHYS9A97034EVAL1 to download the user guide and request samples.

Key features

- Support 28 V bus input
- Supports peak inrush current up to 9.5 A at T_A = 25°C
- Supports 3.3V or 5V control logic to turn-on or turn-off power MOSFET
- Power transistor footprint supports low ohmic TO-257AA and tabless TO-257AA package devices
- Adjustable inrush current peak and charging time with passive components
- On-board rectifier diode footprint for inductive loads
- PCB layout and test points optimized for ease of use for engineering evaluation

Additional information
For further information on technologies, our products, the application of our products, delivery terms and conditions and/or prices, please contact your nearest Infineon Technologies office (www.infineon.com).

Warnings
Due to technical requirements components may contain dangerous substances. For information on the types in question please contact your nearest International Rectifier HiRel Products, Inc., an Infineon Technologies company, office.

International Rectifier HiRel Components may only be used in life-support devices or systems with the expressed written approval of International Rectifier HiRel Products, Inc., an Infineon Technologies company, if failure of such components can reasonably be expected to cause the failure of that life-support device or system, or to affect the safety and effectiveness of that device or system.

Life support devices or systems are intended to be implanted in the human body, or to support and/or maintain and sustain and/ or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.
