1 Maximum ratings

at $T_j = 25^\circ\text{C}$, unless otherwise specified.

Note: for optimum lifetime and reliability, Infineon recommends operating conditions that do not exceed 80% of the maximum ratings stated in this datasheet.

For applications with applied blocking voltage > 525 V, it is required that the customer evaluates the impact of cosmic radiation effect in early design phase and contacts the Infineon sales office for the necessary technical support.

“Linear mode” operation is not recommended. For assessment of potential “linear mode” operation, please contact Infineon sales office.
