ModusToolbox™ Power Suite release notes

ModusToolbox™ tools package version 3.9.0

Power Suite version 1.2.0

About this document

This release of the Power Suite provides an updated version of the Power Suite GUI, which is used to configure, tune, and test power conversion features on supported power boards. This suite is installed in addition to the ModusToolbox™ tools package. This document provides information and known limitations for tools included with this suite.

ModusToolbox™ software is a set of tools that enable you to integrate our devices into your existing development methodology. ModusToolbox™ software consists of various libraries and middleware on GitHub, as well as an IDE and tools package installed on your computer. For more details about what is included with ModusToolbox™ software, refer to the ModusToolbox™ tools package user guide.

Installation

You must have already installed the ModusToolbox™ tools package before installing this suite. If you do not already have the ModusToolbox™ tools package installed, refer to the ModusToolbox™ installation guide for instructions before proceeding.

What's Included

This suite provides the latest features for use with ModusToolbox™ software, including:

- Power Suite GUI version 1.2.0
- Power Suite Filter Coefficient Tool 1.4.0
- Power Conversion Configurator 1.1.0 – Note that is not a new tool, and it has no new features. It is just being included in this pack for the first time.

Known issues

This section lists the known issues/limitations of this release.

Problem	Workaround
When importing an oscilloscope configuration that enables a different set of channels than the current setup but the same quantity (for example, the current enabled channels are 1 and 2, while the imported configuration enables 3 and 4), the Y axis does not update automatically.	Click **Auto Fit All Traces**, **Group Traces**, or disable and then enable active channels to refresh the view.

Documentation

This suite also includes the following documents located in the installation:

- User guides (included with the tools)
