INTERACTIVE PRODUCT SHEET

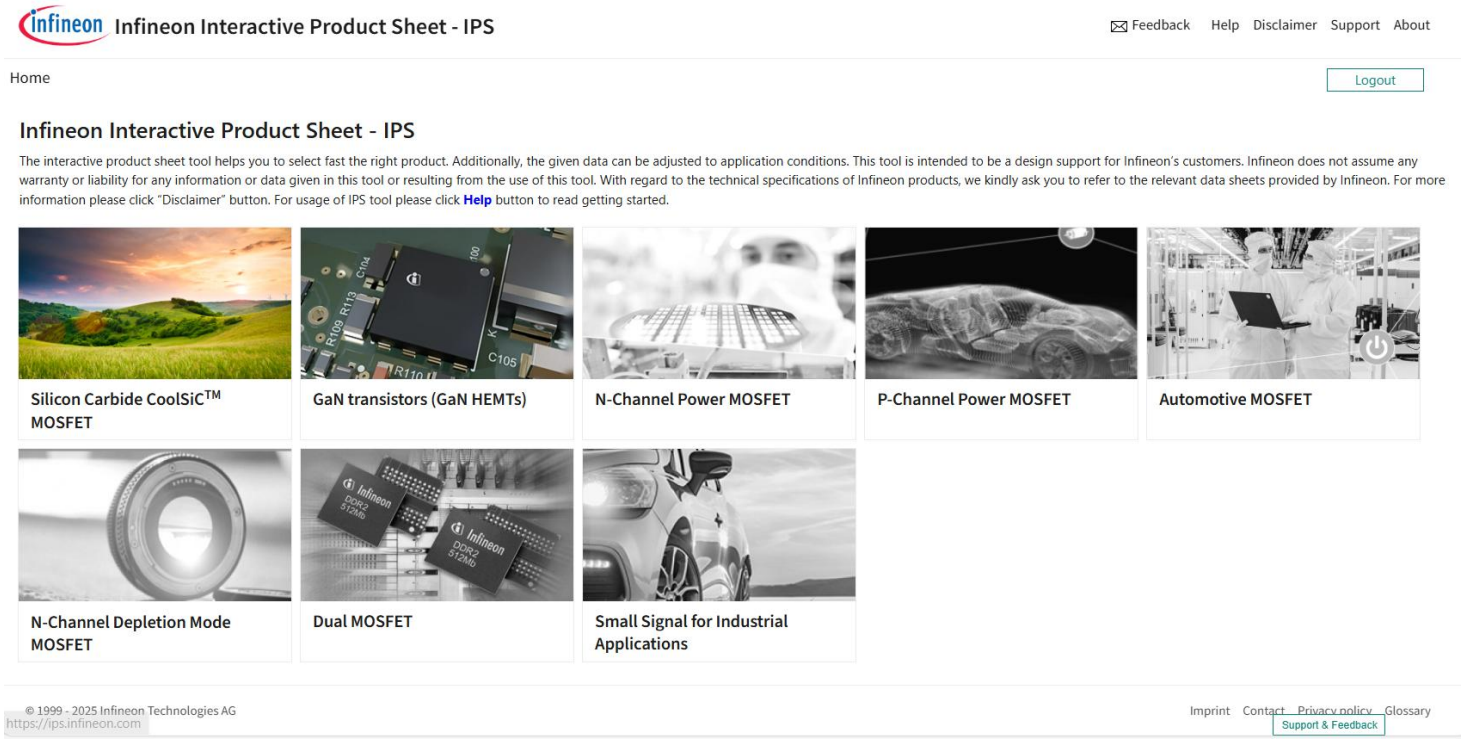

Infineon interactive product sheet (IPS)

Your active product sheet for day-to-day development activities…

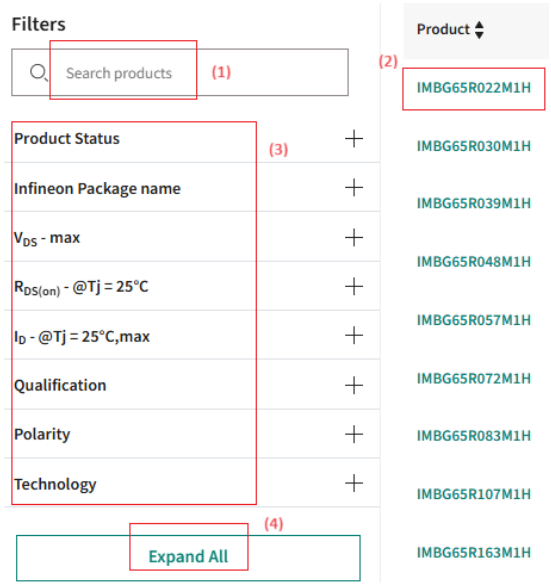

Infineon interactive product sheet is a self-service web tool that runs online circuit simulation in remote Infineon Spice server to generate online interactive product datasheet. You just need to open the IPS tool link in your browser and give the required parameter conditions, then click the “Update diagram” button. After some seconds, the simulation results will be displayed in your browser. With IPS you can not only reproduce the classical datasheet but also can run many more simulations that PDF datasheet cannot provide. In IPS you can read exactly the values at different voltage, temperature and current points.

IPS features

- Feedback – Click this button to write feedback and ask support
- Help – Click Help button to open getting started page
- Export to PDF – Click this button to export the interactive product sheet to PDF file
- Buttons for opening legally binding PDF datasheet, downloading simulation Spice mode

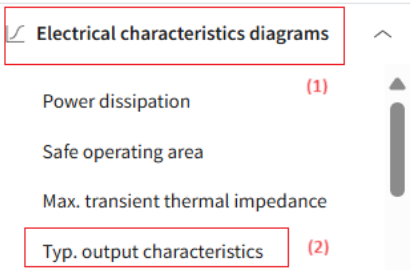

INTERACTIVE PRODUCT SHEET

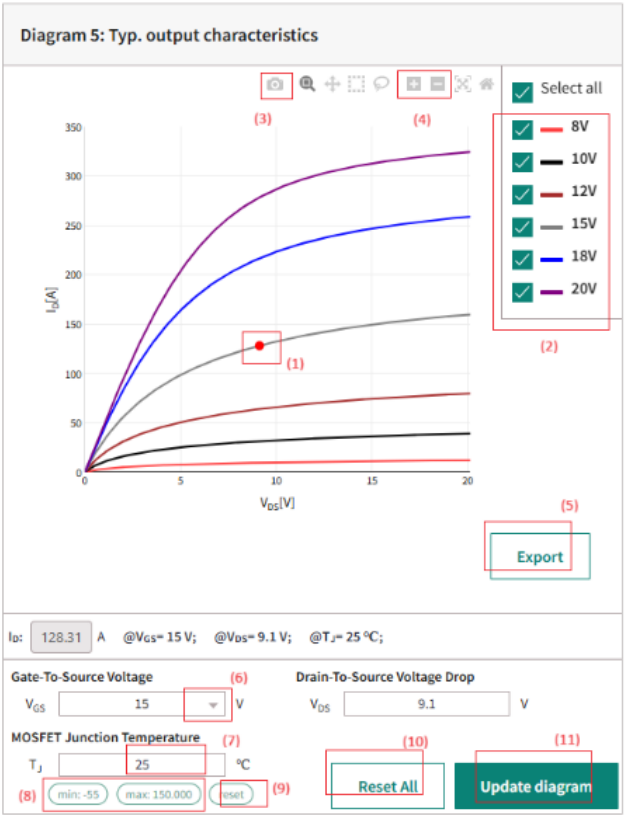

Navigate to device

(1) select category and sub-category in landing page, type device name to find the device
(2) select the device
(3) filter the device using device parameters
(4) expand all device parameters

Navigate to interactive diagram

(1) in navigation bar, click "Electrical characteristics diagrams"
(2) choose the diagram name

Functions in interactive diagram

(1) move the point using mouse to read the value in curve
(2) select/deselect the curve to display
(3) save the chart to an image file
(4) zoom in and zoom out
(5) export curve data to Excel sheet
(6) select voltage value with drop-down list
(7) give input parameter value between the min and max
(8) min and max value for this parameter variable
(9) reset to default input value
(10) reset all inputs to default
(11) update diagram by sending request to server
