

Staff Engineer for Microcontroller (f/m/div)*

Job description

You are interested in Megatrends within automotive application areas such as ADAS and Automated Driving, xEV, Connectivity and Security? Your friends say fuel and electricity runs through your veins? As a Field Application Engineer (FAE) at Infineon, you will mainly support our customers during the evaluation and development of their systems. A trainee program will prepare you for exciting challenges turning you into a specialist of Infineon's memory solutions. After all, we offer the opportunity to work in innovative automotive application areas as part of our highly motivated European FAE Team. Within this role, you will get the chance to work on and challenge yourself with creative solutions as well as concepts of tomorrow and beyond. Location Munich or Langen (closed to Frankfurt) With this position you will be entering our „technical ladder“: our career path for experts. You will be able to focus deeply on technology – while further pursuing your career. As you continually expand your expert knowledge, puzzle over matters and solve problems, you will position yourself as a thought leader – thus helping our products improve our world a bit more each day.

In your new role you will:

- Be the **first level technical contact** for our **key automotive customers in Europe**, with a focus on **Microcontroller Hard & Software** in key automotive applications.
- Support our customers in their **system design** and during the evaluation of our products.
- **Work proactively on optimized MCU Solutions** for our customer's applications together with the entire European FAE Team, the Account Managers, the product experts and the different business lines.
- **Discuss innovative Microcontroller Solution and application approaches** with the customer development teams and **collaborate** with our development department and concept engineering teams to drive optimized and new products and technologies.
- **Validate the application** on-site together with the customer.
- Prepare and execute **customer presentations** and **product / application trainings**
- **Travel in Germany and Europe**

Profile

Besides your technical skills and experience, we are looking for a team player. You have very good communication skills and interaction with people. You are interested in new requirements in Memories Technologies, Memory Architectures and the automotive market and you like to share your knowledge and experience with your customers and colleagues. Additionally, it is required to act on one's own initiative, evaluate chances and risks carefully and be willing to go for the extra mile from time to time.

You are best equipped for this task if you have:

- **A degree in Electrical Engineering, Physics, Information Technology** or similar fields

At a glance

Location: **Langen**
Job ID: **313243**
