

Internship: Automation of a Bitbucket project configuration (f/m/div)*

Job description

Do you want to get deeper insights into software development environments? Then this is the perfect internship for you. Our Team in Munich is looking for a committed student who has already gained some experiences in programming projects, programming languages and continuous integration tools. This sounds interesting? Apply now! We are looking forward to your application!

In your new role you will:

- Implement **custom solutions** for **specific tasks** in current **running projects**
- Receive the **specific requirements** for running many **Bitbucket operations** via **command line**
- Deploy the **solution** using **Python** and respect the **in-house coding guidelines**
- **Document** the given **solution** using **Doxygen**
- **Support** our **methodology engineers** improving the methodology framework and its documentation (Confluence pages)

Profile

You are best equipped for this task if you:

- Study **Computer Science, Electrical Engineering** or similar
- Possess a **talent** in **software development**
- Are experienced in the **programming language Python**
- Gained experience on **Unit and/or system testing of Python code**
- Already have realized several **writing software projects**
- Speak **English** fluently

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Latest grades transcript
- High school report
