

## Data Processing Engineer

### Job description

In this role, you will work independently and self-manage, and work with data crunching and data mining. You will use your data analysis skill to provide insights into data.

#### In your new role you will:

- Prepare **data reports** and **power points** presentations for Engineering and Management
- Populate a tracking sheet and publish a **monthly report**
- Work directly with engineering and assist them with necessary data analysis
- Monitor progress and trends of **certain products** through qualification
- Communicate and collaborate cross-functionally across IR HiRel Products organization
- Follow company procedures and policies
- Support other tasks as they arise

### Profile

#### You are best equipped for this task if you have:

- Experience working with **numbers** and **large Data** (data crunching, data mining)
- High School Diploma or Associate Degree
- At least 0-3 years of related experience preferred
- Strong data analysis and ability to learn new skills
- Familiarity with **spreadsheets**, databases, and **MS Office**
- Proven presentation, **reporting**, and communication skills
- Proven ability to work independently and self-manage

Infineon **Power & Sensor Systems (PSS)** semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world. IR HiRel, part of Infineon PSS, is a leader in high-reliability, hard power management, and RF solutions for space and other extreme environments.

Our leading-edge power devices make chargers, adapters, power sources, and lighting systems smarter, smaller, lighter, and more energy-efficient. Our trusted sensors increase the context-sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.

– We drive leading-edge power management, sensing, and data transfer capabilities –
