

## Electrical Facility Management Engineer (f/m/div)\*

### Job description

Are you an energetic person with the drive to make things happen in a fast-paced environment? Are you excited about having close contact with leading-edge machinery and technology? Do you have a collaborative mindset and a constant focus on quality and efficiency? Then you are the Electrical Facility Management Engineer our team in Cegléd is missing! Our site is expanding and we have a new factory in place ready to welcome the best experts on the market!

As an Electrical Facility Management Engineer, you will actively contribute to the constant improvement of our electronic production factory facilities. In this role, you are expected to analyze complex situations and different information in order to find reliable solutions. Moreover, you will be in close contact with other departments and external partners and your practical attitude will be your ally in the process of discussing ideas and outcomes that will support the successful achievement of the production goals.

#### In this new job you will:

- Be responsible for **running, maintaining, overhauling, and modernizing the facilities of our electronic production factory**;
- Ensure the continuous **availability of technical media supply** (with focus on **electrical supply**);
- Create and follow up **maintenance plans**, managing external service providers;
- Improve the performance through **Building Management Systems' (BMS)** control and monitoring;
- **Lead technical projects** in the field of facility management;
- Keep track and **assess the work carried out by external companies**;
- **Support the operations** by ensuring a 24/7 availability of our systems

### Profile

You are driven by quality, precision, and focus on details. You are a proactive hands-on person willing to take risk decisions while aiming for improvements and high-level efficiency goals. Moreover, you actively contribute to putting decisions into practice, while establishing successful cooperation by regularly sharing your insights with your team.

#### You are best equipped for this task if you have:

- A University or College **Degree in Electronic/ Electrical Engineering or Mechatronics**;

## Why Us

**Part of your life. Part of tomorrow.**

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

### Backend

The **backend segments** enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

*\* The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
