

## Senior Staff Digital Verification Engineer Power Management (f/m/div)\*

### Job description

Have you got a passion for bug-hunting and problem solving? Do you have a good understanding of the digital design and verification flow? If you are ready to take your next career step as digital verification engineer, this position is your opportunity to join a growing, fast paced and strong design and verification team in Villach. You will shape with us the next generation CO2 reduction and emerging application power-management integrated circuits (e.g. autonomous driving)!

In your new job you will:

- **Translate product and design requirements** to a verification plan and maintain it through the project
- **Align, track and report the implementation of test-benches** and stimuli generation according to the verification plan
- **Run simulations, analyze results** and **conduct verification reviews** to ensure that requirements are met
- **Optimize the verification methodology** (UVM, formal) in close cooperation with our team experts
- **Demonstrate clear and consistent communication** with the application, concept and design teams

### Profile

You are a team player with excellent communication skills and you want to get things done. You are convinced that a thorough, systematic and methodic design verification is a mandatory task for a successful tape-out and first-time right product!

You are best equipped for this job if you have:

- **A university degree in Electrical Engineering, Informatics** or equivalent
- **At least 5 years' experience** in digital design verification
- **Working knowledge of SystemVerilog, UVM** or formal verification

Candidates with a longer working experience and technical lead role can also apply for this position!

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group H (<https://www.feei.at/wp-content/uploads/2021/04/minimum->

## Why Us

**Part of your life. Part of tomorrow.**

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

**– Power & Sensor Systems (PSS) drives leading-edge power management, sensing and data transfer capabilities –**

Infineon **PSS** semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world. Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.

At **Infineon in Villach** you shape the technologies of tomorrow and work in an international environment with more than 3700 colleagues from over 65 nations. Your personal contribution will be valued and appreciated as the cornerstones of our success. And all that in beautiful surroundings which guarantee a high quality of life.

The **City of Villach** is located in the center of Carinthia, Austria’s southernmost province, in close proximity to the Italian and Slovenian border. Living in Austria has many social, health-care-related and economic perks. The country’s social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach itself benefits from its status as a “small town”, offering everyday living at affordable prices in an outstanding setting.
