

Project Manager Funding Projects (f/m/div)*

Job description

Do you describe yourself as a natural driver and a product expert with great networking capabilities and experience? Are you open to new ideas and pushing them to their full implementation and application? In this role, you manage diverse funding projects and follow up on project execution. This position is part of Infineon's Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- **Scan national and EU programs for funding opportunities** and compile funding proposals to acquire new projects.
- **Coordinate the funding initiatives at CSS and support the acquisition** and setup of new funding projects.
- Manage the **overall funding setup at CSS with respect to the process, budget and timelines for projects** handled by your own and by other project managers.
- Manage a **couple of funding projects with external and internal partners**, national and international.
- Guide project partners, **manage deliverables and execute project** according to target schedule.
- Present **project results as reports or in person** in project workshops.

Profile

You consider the implications of your actions on others in his/her thoughts. You have a clear notion of how innovation contributes to the commercial success of the company. Furthermore, you are personally committed to the customer's concerns and award them a high priority.

You are best equipped for this task if you have:

- **A university degree in Electrical/Electronic Engineering** or equivalent
- At least **5 years of experience within the semiconductor industry** - thereof 2 years of the leading project
- Solid understanding of **integrated circuits functionality** and design techniques
- Profound **Project Management skill**
- Convincing **communication and presentation skills** to work successfully with internal and external stakeholder
- Solid **MS-Office skill**
- Fluent **German and English** skills

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

–Connected Secure Systems (CSS) delivers security for the connected world –

The Connected Secure Systems (CSS) segment offers comprehensive systems for a secure, networked world with a portfolio built around reliable, trendsetting microcontrollers as well as wireless connectivity and security solutions. Over the past decades, CSS has developed microcontroller, Wi-Fi, Bluetooth and combined connectivity solutions (known as connectivity combos) and hardware-based security technologies. The products are used in a broad range of applications: from consumer electronics, IoT and home appliances to IT equipment, cloud security and networked cars all the way to credit and debit cards, electronic passports and IDs. With its leading technologies in the areas of computing, connectivity and security, CSS makes a decisive contribution to protecting today's and tomorrow's networked systems.
