

Principal RFIC Design Engineer

Job description

Do you enjoy the challenge of working for an innovative company with leading-edge technology? Come join our exciting team as a RFIC Design Engineer.

In your new role you will:

- Be responsible for the design and development of radio transceivers. Cypress'802.11ac, 802.11a/b/g/n, and BT solutions enable manufacturers to build wireless connectivity products with the performance, interoperability, security, and ease-of-use that consumers and businesses demand
- Be responsible for the design of radios in various process technologies including deep submicron CMOS encompassing the design of RFIC transceiver blocks such as low noise amplifiers, power amplifiers, VGAs, mixers, RF PLLs & synthesizers, and filters
- Help with transistor modeling for RF design, RF board and module design, and lab characterizations

Profile

You are best equipped for the task if you have:

- Ph.D. or MS in Electrical Engineering (or equivalent) preferred
- Expertise in RFIC CMOS designs is highly desirable
- At least 5 years of CMOS RF IC design experience in several of the following areas:
 - RF blocks used in transmitters and receivers
 - Front-end (LNA, mixers, PA drivers, PAs)
 - PLLs & Frequency Synthesizers
 - Transceivers baseband blocks (filters, VGA, ADCs & DACs)
- Must be a self-starter, passionate for his/her work, and be able to work well in a team of RFIC design engineers
- System-level specification, floor planning, characterization, and productization experience are desired

Benefits

- **San Jose, CA:** Möglichkeit für Coaching, Mentoring & Netzwerken; Trainingsangebot & strukturierte Entwicklungsplanung; Möglichkeit zur internationalen Entsendung; Verschiedene Karrierepfade: Project Management, Technical Ladder, Management & Individual Contributor; Flexible Arbeitszeit:

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Cypress Semiconductor Corporation is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex (including pregnancy, childbirth, or related medical conditions), gender identity, national origin, ancestry, citizenship, age, physical or mental disability, legally protected medical condition, family care status, military or veteran status, marital status, domestic partner status, sexual orientation, or any other basis protected by local, state, or federal laws. Applicants with questions about access or requiring a reasonable accommodation for any part of the application or hiring process should contact the Talent Network by phone at (408) 503-2194.

– Connected Secure Systems (CSS) delivers security for the connected world –

The Connected Secure Systems (CSS) segment offers comprehensive systems for a secure, networked world with a portfolio built around reliable, trendsetting microcontrollers as well as wireless connectivity and security solutions. Over the past decades, CSS has developed microcontroller, Wi-Fi, Bluetooth and combined connectivity solutions (known as connectivity combos) and hardware-based security technologies. The products are used in a broad range of applications: from consumer electronics, IoT and home appliances to IT equipment, cloud security and networked cars all the way to credit and debit cards, electronic passports and IDs. With its leading technologies in the areas of computing, connectivity and security, CSS makes a decisive contribution to protecting today's and tomorrow's networked systems.

Employment at Infineon is contingent upon proof of your legal right to work in the United States under applicable law, verification of satisfactory references and successful completion of a background check and drug test, and signing all your onboarding documents.

In some instances, if applicable, U.S. export control laws require that Infineon obtain a U.S. government export license prior to releasing technologies to certain persons. This offer is contingent upon Infineon's ability to satisfy these export control laws as related to your employment and anticipated job activities. The decision whether or not to submit and/or pursue an export license to satisfy this contingency, if applicable, shall be at Infineon's sole discretion.

IMPORTANT NOTICE:

Infineon is requiring all new U.S. employees and contractors to be fully vaccinated against COVID-19. Full vaccination is defined as two weeks after both doses of a two-dose vaccine or two weeks since a single-dose vaccine has been administered. Anyone unable to be vaccinated, either because of a sincerely held religious belief or a medical condition or disability that prevents them from being vaccinated, can request a reasonable accommodation.

Infineon Technologies takes data privacy and identity theft very seriously. As such, we do not request personally-identifiable information (PII) from applicants over the internet or electronically. Please kindly refrain from disclosing your PII electronically during the application process or to unauthorized websites that may purport to be Infineon or any of our affiliates.
