

Graduated Trainee Program (Engineering Graduates)

Job description

In your new role you will:

- Responsible on AOI process in wafer test area.
- Providing sustaining engineering support, this include yield monitoring and reporting, disposition of problem lot with low yield issue during AOI process.
- Manage and sustain AOI recipe in both machine and server
- Release and qualify new AOI machine to optimize production output
- Define, review, update and implement written specification for AOI related processes to standardize manufacturing process with other IFX sites as well as maximize production performance and yields
- Support new product introduction by developing/introducing new AOI concept
- Monitoring, logging and tracking of AOI machine throughput.
- Support production in planning and executing capacity expansions for volume ramps for new and existing products
- Support in yield enhancement project and quality return topic from customer.
- Initiative to conduct evaluation & study for cost saving, capacity expansion and quality improvement project

Profile

You are best equipped for this task if you have:

- 0-1 years of working experience in wafer fabrication environment
- Preferable with Wafer Testing/Process knowledge
- Flexible, innovative, good team work and can work independently
- Good communication and interpersonal skills
- Able to work in standard 5 days shift pattern (normal working hours)
- Able to commit 12 months contract

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.
