

Maintenance Engineer (f/m/div)*

Job description

Do you consider yourself a professional with a strong technical background looking for a new challenge? Would you like to have close contact with high-tech machinery? Then this is the right opportunity for you! Here you will find a stimulating environment and a high skilled and dynamic growing team. Join us as a Maintenance Engineer in Cegléd and help us make a difference in a multinational work environment.

As a Maintenance Engineer, you will play a crucial role in coordinating the maintenance, troubleshooting and recondition of machines and equipment. Your practical attitude will definitely be your ally in implementing the suitable solutions you come up with. Moreover, you are expected to supervise and implement preventive actions and analyze their efficiency, while keeping in contact with other teams for improvements.

In your new role you will:

- Support **daily maintenance and troubleshooting activities**;
- **Plan, organize and document the maintenance tasks** while complying with quality, safety and environmental regulations, as well as with the work and procedure instructions;
- Support the **installation of new machines and equipment** by coordinating it with the infrastructures and logistics;
- Set-up and develop **preventive maintenance actions**;
- Analyze **equipment failures, identify and propose improvements**;
- Determine and supervise of **spare parts stock**.

Profile

You are quality-oriented and remain focused on reliable solutions. You are able to coordinate your work with your team and regularly share your insights with them. You have a great set of analytical skills that allow you to solve problems in an efficient way. Furthermore, you aim toward innovation so you actively contribute to putting decisions to work.

You are best equipped for this task if you have:

- A **University Degree in Electrical/Electronic, Mechanical or Automation Engineering**;
- **3 to 5 years of experience** in a manufacturing environment in the **maintenance field** would be an advantage;
- Knowledge and application of **SAP PM** would be a plus;

- **Maintenance training** would be a plus;
- **Fluency in Hungarian** and **good command of English**. German would be an advantage.

Please send us your CV in English.

Benefits

- **Cegléd:** Möglichkeit für Coaching, Mentoring & Netzwerken; Trainingsangebot & strukturierte Entwicklungsplanung; Möglichkeit zur internationalen Entsendung; Verschiedene Karrierepfade: Project Management, Technical Ladder, Management & Individual Contributor; Offenheit für Teilzeit (auch in der Elternzeit); Sozialberatung & Betriebsarzt; Gesundheits- & Vorsorgeprogramme; Arbeitgeberfinanzierte betriebliche Altersvorsorge; Erfolgsbonus

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Backend

The backend segments enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
