

Senior Expert Security Management EMEA (f/m/div)*

Job description

Protecting an organization's assets – including people, buildings among others – against risk is your passion? You love to develop and implement security programs? Finally, it does not seem like a risk for you to take on a new challenge and apply for this role!? Then we are looking forward to receiving your application and eventually welcoming you as our new "Senior Expert Security Management EMEA"!

In your new role you will:

- **Improve Infineon's physical security governance** by:
 - Ensuring consistent set of policies and guidelines, control framework
 - Managing expectations and define responsibilities
 - Assessing Threats and Vulnerability considering local conditions
- **Research and analyze geopolitical and travel related threats** to Infineon and its employees and coordinate mitigation measures
- Support to **improve the existing travel security programs** by:
 - Setting up and running a comprehensive threat based situational security program supporting our travel security program
 - Coordinate related procedures and escalation plans with our global Security Control Center
- Support the Crisis Management Team
- Conduct and Support **investigations in the EMEA region**
- Collaborate with the Corporate Security team in further areas of Corporate Security's scope

Profile

You describe yourself as an individual who is able to quickly establish a successful cooperation with stakeholders. Furthermore, it is one of your strengths to recognize potential obstacles in time and use them as good opportunity for further improvement. Lastly, you take in information quickly, evaluate it from different points of view, and uncover hidden correlations in it.

You are best equipped for this task if you:

- Hold a **degree in security management, political sciences** or correlated areas

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

Business Continuity (BC) is a cross-functional task with 'Corporate Governance' and operational functions aiming to ensure uninterrupted business and to create value for the company mainly by providing a stable business environment, ensuring compliance with legal, customer & internal requirements, being an attractive partner for stakeholders and customers in sustainability. Corporate Security within Business Continuity protects the organization's employees, tangible and intangible assets, such as company reputation, property, equipment, processes and information.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
