

## Senior Project Manager for Radar Products (f/m/div)

★

### Job description

You are a manager, a leader and an expert - all at the same time?! As Senior Project Manager for Radar Product Development you will drive exciting and future projects of groundbreaking radar technologies. You will bring this technology to support a wide range of industrial, consumer and automotive applications. This position is part of Infineon's Project Management Career Path. It is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- **Manage international multi-million product development projects** for radar sensors across various functional departments
- Take on **full Project Manager responsibilities**; this includes the overall project planning, development target alignments, resources, budget
- **Conduct risk assessments** and mitigation as well as **reporting of milestones**
- Break down **complex project issues** to discuss and report your project with the middle and upper management
- **Lead local and international project teams** of technical experts
- **Ensure and monitor the professional and target-oriented project work** according to the agreed project goals and budget
- **Collaborate closely with frontend and backend fabs** in terms of TapeOut, qualification and Ramp-Up scheduling

### Profile

You like to collaborate with multiple stakeholders and you are the definition of a communicator; your way of being inspires and encourages your colleagues to succeed. You resolve conflicts in a highly effective and sustainable manner. You like to work with responsibility and connected freedom in decision making processes. Organizing and coordinating multiple work streams is just common for you. You recognize new opportunities and cooperate across boundaries to pursue them effectively. At the same time, you remain aware of the big picture.

You are best equipped for those tasks if you:

- Have an excellent technical understanding based on **a degree in physics, microelectronics, electrical engineering, nanotechnologies, materials sciences** or comparable

### At a glance

## Why Us

**Part of your life. Part of tomorrow.**

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

**– Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –**

Infineon **PSS** semiconductors are enabling intelligent power management, smart sensitivity, and fast, reliable data processing in an increasingly digitalized world. Our state-of-the-art power and connectivity devices make chargers, servers, mainboards, power tools, and lighting systems smarter, smaller, lighter, and more energy-efficient. In addition, our trusted sensors give things an intuitive sensing capability to make them contextually aware, and our RF chips support fast and reliable data communications.
