

Senior IT Business Analyst - Technical Documentation Solutions (f/m/div)*

Job description

Do you describe yourself as a dynamic and technical person who can structure and solve complex tasks in a digital environment? If you have a strong IT background especially the area that supports Technical Documentation technologies and enjoy delivering solutions to your customers - we should get to know each other. As a Senior IT Business Analyst, you will manage and deliver solutions that generates a wide variety of documentation output formats to the organization. Does this sound like a perfect challenge for you? Then take the opportunity and send us your resume!

In your new role you will:

- Drive projects to **deliver solutions in the Technical Documentation area with an end-to-end view** including operations in mind
- **Transform business requirements into IT solutions** and integrate them into our existing landscape
- Act as an **application owner**: you will define, manage and support users of the application while ensuring stability, performance and good integration with other
- **Drive application roadmap** based on the IT and Business roadmap
- Actively improve the solution landscape through test automation, technical analysis, best practice sharing and training
- Collaborate with internal cross-functional teams and external service providers in a global environment

Profile

In order to establish a successful relationship with your internal customers, you listen actively and consider their points of view, thoughts and ideas. You are a pro-active person, who has a “hands-on” mentality in driving solutions. As a team player, you collaborate beyond borders and appreciate the contribution of others.

You are best equipped for this task if you have:

- A **degree** in **Information Technology, Computer Science, Business Informatics** or in a related field
- More than **5 years experience** in IT application management whereof experience with **technical documentation methodologies** would advantageous e. g. Component Content Management System (CCMS), DITA Open-Toolkit, open XML-based standards, content transformation (HTML, PDF etc)
