

Senior Staff Engineer Process Block Pad Metallization (f/m/div)*

Job description

Are you searching for a new challenge? Infineon is seeking an energetic and ambitious person to expand their team in Villach as their new Senior Staff Engineer Process Block Pad Metallization. In this position you can actively use your communication skills and your analytical and strategic mindset to help us shape the future. Sounds interesting? Don't hesitate and apply now!

We are searching for a **high-level technical expert** in the field of **materials** and **manufacturing of Metallization** for Semiconductor devices.

As a Senior Staff Engineer Process Block Pad Metallization you:

- Accompany the **introduction of new power technologies** with focus on chip metallization processing
- Run specific **pre-development projects** to provide process solutions for future requirements
- Define and develop **new integration-schemes** and **long-term strategies** for metallization processing especially for high current density
- Define and introduce **new characterization methods**
- Keep **process** and **material diversity** under control and help our production to achieve efficiency targets
- **Share** your **knowledge** and **experience** in cross functional trainings

With this position, you will enter the “Technical Ladder” which is our carrier path for experts. You will be able to focus deeply on technology challenges – while further pursuing your carrier. Your global responsibility implicates intercontinental business trips. Mutual exchange with internal and external partners is an essential part of your job as technical expert for Pad-Metallization.

Profile

You are best equipped for this task if you have:

- A Master 's degree or Ph.D. in **Physics Science / Material Science, Electrical / Microsystems Engineering** or equivalent
- At least **6 years** of working experience in **metallization** of semiconductor technologies, preferably in any areas like metal deposition processes, structuring, cleaning, and respective physical characterization methods
- Experiences in **leading teams** functionally or technically and are **team-oriented**
