

Director System Application Engineering Hardware (f/m/div)*

Job description

Are you passionate about E-Mobility, Autonomous Driving, Connectivity and Security? You want to be part of a creative, innovative, global and cross-functional team of technical experts and shape the future of mobility? We are looking for a Director System Application Engineering Hardware, who enjoys to lead a team of technical experts and bring them to the next level!

In your new role you will:

- **Leading a HW and Simulation System Application Engineering Team** in Munich in close cooperation with System Application Engineering Teams in other locations
- **Manage and coordinate HW relevant system application engineering projects** – both Infineon internal and external for new and emerging automotive applications
- **Leading HW System Demonstrator development activities** - requirement capturing, simulation, manufacturing, aligned planning with Business Lines and execution
- **Coordinate local development efforts** with internal and a variety of external customers and partners
- **Represent specific HW design needs** with external tools vendors
- Be responsible for the **definition of both HW and simulations (digital twin) development processes and methods used** within the HW system applications engineering team
- **Ensure that HW design methodology is in place** and up to date as defined by state of the art in our Tier 1 and OEM customer landscape
- **Support the Head of System Applications Engineering** in standardization and funding activities and gain funding for research activities and early development topics

Profile

With your entrepreneurial and team spirit, business understanding and technical knowledge, you collaborate with people from different functions to continuously deliver outstanding results and meet the set direction. You have the passion and the courage to develop and challenge new solutions and creative ideas, which you explain in a clear and convincing manner. Furthermore, your customers are always at the heart of your thoughts and actions and you are able to establish trusting and long-term relationships.

Beyond, you are best equipped for this task if you have:

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
