

Project Manager Automotive IP Development (f/m /div)*

Job description

Would you like to be in charge of the Project Management for development of new IP modules, at target cost, timeline, as well as performance and project feasibility and for the project team organization in an international and cross-site environment? If this sounds interesting to you, then make sure to apply now. We are looking forward to receiving your application! The PJM Career is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role your tasks are:

- **Project Management for development of new IP modules**, at target cost, timeline, as well as performance and project feasibility
- **Project team organization** in an **international and cross-site environment**
- **Planning, monitoring and deviations management**; risks management
- **Responsibility for achievement of project compliance** according to IFX ATV design processes, ISO 16494 and ISO 26262 where applicable
- **Project status reporting** (steering committee, project reviews, board), **escalation of risks** and **decisions to Project Owner**, preparation of **change requests** (change of scope, timeline and/or budget violations) together with Project Owner
- **Ensure positive and smooth interactions in the project team**, keep motivation high, ensure hurdles are promptly addressed, and issues are openly discussed
- **Mentoring of other Project Managers**, **best practice** and **lessons learned sharing** within the organization
- Active contribution in **development of methodology**

Profile

You set yourself ambitious goals and take on new challenges without knowing the right path to an eventual solution in advance. You are personally committed to the customer's concerns, award them a high priority and focus your efforts on finding solutions that offer added value for both sides. You are able to quickly establish a successful cooperation and recognize and use different areas of expertise and skills of the team members.

You are best equipped for this task if you have:

- A degree in **Electrical Engineering**, **Computer Science** or similar
