

Laboratory Technician (f/m/div)*

Job description

Do you want to work in a multinational and dynamic environment? Do you wish to contact with the latest technology and equipment? State of the art semiconductors are being developed every day at our R&D center in Bucharest and now you can be an important part of it. Embrace a stimulating challenge by joining us as Laboratory Technician!

As a Laboratory Technician you will assist the engineering department by performing maintenance on electrical equipments, organizing lab space, managing inventories, interacting with other departments, as well as acting as a supplier interface.

In your new role you will:

- **Support lab users** in the daily activities
- Check instrumentation and **perform calibrations, verifications and repairs**
- Be responsible for **lab infrastructure maintenance and support lab audit**
- Build up and/or **maintain component and instruments databases**
- Perform **PCB components assembly/soldering, inspection, reworking and packaging**
- Prepare proposals and negotiate **maintenance contracts for equipment**.

Profile

You are a team player who demonstrates strong communication skills, and you quickly establish a successful cooperation by regularly sharing your insights with your colleagues. Moreover, you actively contribute to putting decisions to work as soon as they are taken, while supporting the team to excellence. You are a highly methodical and organized person.

You are best equipped for this task if you have:

- Graduate of a **technical school or university** (Electronics, Computer Science, Automation etc.)
- Experience in **applied electronics** and understanding of **electronic schematics**
- Experience in **electrical equipment maintenance**
- Orientation to **problem solving, analytical thinking** and a **highly organized mindset**
- **Team spirit** and willingness to cooperate closely with international counterparts
- Good command of **English** language.
