

Senior Software Engineer (f/m/div)*

Job description

You are searching for a new challenge and are open for an international adventure? You like to drive innovation through your technical and personal contribution? This is your chance! Join us as Senior Software Engineer (f/m/div)* and enrich our team in Villach.

In your new role you will:

- **Be part of a SW development team** in the area of **automation of chip test program development**
- **Develop methodologies and tools for the generation of test patterns and test programs**
- **Be responsible for the analysis of requirements, concept and specification, implementation, and testing/QA of new SW tools**
- **Collaborate with international teams at world-wide Infineon sites**
- **Provide user support, presentations/demos and training for the users** in the business units

Profile

You are best equipped for this task if you have:

- **A university degree in Computer Science or Information Technology**
- **At least 3 years of experience as a software engineer in Unix/Linux platform**
- **Very good skills in C/C++ and script languages** (e.g. csh, Perl, Python,)
- **Experience in Tracking systems like JIRA, Revision control systems** (Git/LFS, ClearCase)
- **Knowledge in Requirements-Driven Design Flow** (RDDF)
- **Excellent mindset for SW quality and Agile development processes**
- **Very good command of English language**, German is a plus

With your independent working style, you ensure that deliverables are complete in high quality and remain aware of the big picture even in complex situations. You demonstrate strong communication skills and know how to establish lasting relationships and networks.

We are filling this position through one of our leasing partners. A valid work permit for Austria or EU citizenship is a prerequisite for this position. This position is subject to the collective agreement for workers and employees in the electrical and electronics

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The central R&D organization „**Design Enabling and Services**“(DES) provides the design environment to the different Infineon product development teams. With state-of-the-art design methods, building blocks and a wide range of product development services DES supports Infineon's advanced IC development from early high level system models to verified products ready for manufacturing.

The City of Villach is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Due to its particular geographic location and the outstanding natural beauty of the region, Villach and the whole province of Carinthia have for generations been popular holiday destinations for people from all over the world. Its unique landscape combines mountains and valleys, lakes and rivers, city and countryside. In addition to the favorable geographic location, living in Austria also has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach benefits from its status as a “small town,” offering everyday living at affordable prices in an outstanding setting. So it's no surprise that the city on the Drau is considered the “home of work-life balance”.
