

Specialist Configuration, Change & Requirement Management and SCRUM Support for Automotive Sensors (f/m/div)*

Job description

You pursue ambitious goals and generate value with your ideas and solutions? Furthermore you communicate openly, clearly, and coherently and are able to quickly establish a successful cooperation? We have the perfect job for you - apply now to become part of our team at Infineon in Villach!

To strengthen our IC product development team we are looking for a Specialist Configuration, Change & Requirements Management and SCRUM Support for Automotive Sensors with focus on ISO 26262 Functional Safety products.

In your new role you will:

- **Define, setup and maintain Configuration, Change & Requirement Management infrastructure** (SPS, JIRA, JAMA, Release Manager, document management system (DMS), SVN, ClearCase)
- **Identify and maintain all documents** that are created and used during project development
- **Review of the formalities** according to relevant ISO* standards prior to their official releases
- **Support the Project Manager** with creation and maintenance of **Product Configuration, Configuration Baselines** and their records
- **Support (execution) of Configuration Audits** as well as **support the engineering team** in writing clear requirements and their tracing based on Infineon standard and rules
- **Provide consolidated requirements traceability** and **coverage reports** through all requirements levels, based on inputs from engineering team
- Be the **project administrator for the requirements management tool** and **support users** in tool handling
- Support of **development projects according to SCRUM and AGILE** processes.

Profile

You are best equipped for this task if you have:

- A **technical education** (HTL/FH/University) in the field of **Electrical Engineering, Microelectronics** or equivalent
- A **precise working style** with a **focus for details**

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.

At **Infineon in Villach** you shape the technologies of tomorrow and work in an international environment with more than 3700 colleagues from over 65 nations. Your personal contribution will be valued and appreciated as the cornerstones of our success. And all that in beautiful surroundings which guarantee a high quality of life.

The **City of Villach** is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Living in Austria has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach itself benefits from its status as a "small town", offering everyday living at affordable prices in an outstanding setting.
