

Driving decarbonization and digitalization. Together.

Procurement Category Manager (f/m/div)*

Job description

Would you enjoy working in a multicultural and dynamic environment in constant growth? Do you want to have a key role in our procurement department? Are you ready to jump into your next professional challenge? Then you should definitely join us as a Category Manager!

As a Procurement Category Manager, you will be responsible for managing the procurement of specific goods or services for Infineon, working to achieve the best possible results. You will be responsible for developing and executing a sourcing strategy, negotiating contracts and agreements with suppliers, and managing supplier relationships to ensure the best-purchased quality and supply chain possible.

In your new role, you will:

- **Manage** medium to large volumes to the **high complexity of the commodities**.
- Coordinate with a cross-functional team to **identify areas for cost reduction and process improvement**.
- **Develop and execute an operations plan** with **yearly goals** to inform Infineon's Management and sites about the planned procurement strategy and main areas of activities.
- Contact **internal** and **external interface partners** and **suppliers**.
- **Reporting of monthly costs and risks** to have a clear, understandable, and cost-effective regulation among the Infineon community.
- Negotiate **global contracts and agreements**.
- Actively **support local projects**.

Profile

You'll be best equipped for this job if you have:

- University Degree in **Business Administration, Economics, or Technical /Engineering background or similar fields**.
- At least **3 year experience** as a Category Manager or Strategic Buyer or in a partner function with a high focus on technical issues communicated with suppliers.
- Experience in **direct materials procurement**.
- Intercultural working experience advantageous.

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

Backend

The backend segments enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
