Driving decarbonization and digitalization. Together.

Principal System Architect Secured Localization (f/m/div)*

Job description

Unlock the Power of Precision! Are you ready to shape the future of secure localization technologies? Infineon Technologies is seeking a dynamic and visionary Principal System Architect Secured Localization to lead our innovative endeavors. Unleash your potential with us and be at the forefront of groundbreaking solutions. Seize the opportunity to localize success at our Development Center in Graz, where precision meets innovation. Chip in and apply now!

Step into the role of **Principal System Architect Secured Localization** at Infineon Technologies! Define the future of secure localization, leading the orchestration of innovative concepts and influencing global standards. Drive innovation, shape cuttingedge solutions, and be the architect of Infineon's secure ranging products.

- Creator: Translate application requirements into tangible solutions and interpret stakeholder demands based on passion for technology. Your role is pivotal in bringing products and solutions to life.
- Architect: Drive the architecture of cutting-edge UWB hardware and software products. Your fingerprints will be on the technologies of tomorrow, driven by customer requirements and a profound understanding of applications.
- Trendsetter: Embark on a journey of technical trend scouting and discover value drivers for futures applications. Be the pioneer in shaping what comes next and shape standardization worldwide with your expertise.

Profile

You have a **pioneering spirit** and **passion for innovative technologies**. Infineon Technologies embodies the essence of teamwork, living by the motto 'Teamwork makes the dream work,' as we passionately pursue our aspirations together. Thus, you are able to **communicate openly and clearly** not only within your own team, but also with a variety of internal and external stakeholders.

Your electrifying toolkit includes:

- At least 6 years of professional experience in defining hardware or software architecture in semiconductor or related industries
- A deep understanding of secure ranging or localization applications and use cases (e.g., Car Access, Access Control, Item Tracking)
- An independent working style with the ability to collaborate across diverse global teams
