

Driving decarbonization and digitalization. Together.

Material Quality Assurance Senior Specialist (f/m /div)

Job description

Are you looking for an opportunity to level up your career? Do you have a strong technical background in Engineering? Well, your excellent organizational skills, your analytical mindset, and your constant focus on quality and efficiency will make this job the perfect match for you. Come and join us as Material Quality Assurance Senior Specialist at Infineon Cegléd.

You will play a crucial role in investigating and resolving raw material issues and ensuring continuous production. This role involves conducting risk assessments, managing costs, and participating in quality improvement processes.

In your new role, you will:

- **Investigate raw material-related issues** coming from incoming inspection, production, and customer complaints, analyze the problem and organize measurements if necessary;
- **Handle raw material quality problems efficiently** and in a timely manner to ensure continuous production (e.g. liaising with external service providers);
- **Collect all data** in case of supplier-related quality problem and **prepare a documentation package** and forward it to the responsible **Supplier Quality Manager**;
- **Organize and coordinate Risk Assessment meetings** in case of raw material issues;
- **Support Risk Assessments** in case of transfers, new material, and new supplier introduction;
- **Support the new product release process (PPAP)** by organizing the necessary measurement activities;
- **Coordinate the blocking and releasing processes** of raw materials and tracks the actual blocked stock;
- **Start Material Review Board (MRB) process** in case of raw material issues;
- **Be responsible for and actively take part** in raw material-related **8Ds**, take part in **transfer projects**, and execute related tasks.

Profile

You manage your performance consistently and reliably. You have strong communication skills and the know-how to establish lasting relationships and networks. You can clarify areas of responsibility, coordinate your work with your colleagues, and regularly share your insights with the team. Moreover, you analyze

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

Backend

The **backend segments** enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development, and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation, quality, assembly, and testing.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
