

Driving decarbonization and digitalization. Together.

Internship: Automotive Microcontroller Applications Engineering (f/m/div)

Job description

You want to get a broad overview of Automotive Embedded System Development as well as Embedded Software Development? Then this is your chance to work with an international team in Langen on your own interesting project. The project will be related to our new Automotive Microcontroller Product Traveo II Cluster. Sounds interesting? Then apply and make life easier, safer and greener with us! We are looking forward to your application!

- **Shape the future:** You develop, update and maintain software examples for Infineon microcontrollers (Traveo, Aurix, PSoC)
- **Take responsibility:** You get your own project to work on
- **Keep up to date:** You create project documentation for hardware and software components
- **Reliable work:** You have various support tasks within the Automotive Application Engineering-Team

Profile

- **Study field:** You are currently studying Electrical Engineering, Embedded Systems, Computer Science or similar
- **Programming skills:** You bring along programming skills in C
- **Know-How:** You already gained some experiences in the area of embedded development and know standard microcontroller interfaces (UART, SPI, I2C)
- **Experience:** You gained first experiences with ARM based microcontrollers
- **Way of working:** You have an independent and conscientious working style
- **Language skills:** You have fluent English skills, German is a plus

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Excerpt of the study regulations for the mandatory internship (if applicable)
- Latest grades transcript (not older than 6 months)
- High school report

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

The **ATV division** is shaping the future of mobility by enabling clean, safe, and smart cars. Its product and solution offering is powering the decarbonization and digitalization of vehicles. By driving the transition to hybrid and purely electric vehicles, ATV is making a valuable contribution to cleaner roads. ATV is also increasingly digitalizing cockpit, infotainment, comfort, and lighting applications as it takes automated driving to the next stage with higher levels of connectivity, security, and safety.

The ATV portfolio integrates sensors, microcontrollers, high-performance memories for specific applications, power semiconductors based on silicon and silicon carbide, as well as components for human-machine interaction and vehicle connectivity. Infineon is the world leader in automotive semiconductors.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
