Job description

Cypress Semiconductor Corporation is seeking a Senior Manager Forecasting (San Jose, CA) to perform forecasting for our IoT Compute & Wireless (ICW) business line. Plan and direct production, purchasing, warehousing, distribution, and financial forecasting services to limit costs and improve accuracy.

Senior Manager Forecasting (San Jose, CA)

Cypress Semiconductor Corporation is seeking a Senior Manager Forecasting (San Jose, CA) to perform forecasting for our IoT Compute & Wireless (ICW) business line. Plan and direct production, purchasing, warehousing, distribution, and financial forecasting services to limit costs and improve accuracy. Examine existing procedures and identify opportunities to streamline activities to meet product distribution needs. Lead all aspects of Quarterly Product Marketing forecasts (VRFC) and enter the forecast figures into Blue Yonder forecasting tool on a customer and product granularity. Create and present management reports, outing all changes from current forecast against previous cycle final numbers. Confer with BDP and SCP planning teams to create supply plans that ensure availability of products and ensure all steps of manufacturing understand the demand. Manage activities related to material requirements planning and controlling inventory, using ERP systems as well as inventory management software. Develop procedures for coordination of supply chain management with other functional areas such as sales, marketing and finance. Conduct decision-making to bring areas of concerns against final approved forecast with alignment of the current backlog. Coordinate and report on both the status of the forecast until closure and then switch to revenue attainment against the forecast. Ensure all leadership within the Business Line understand the current situation whether it in closing the forecast or how closely the revenue is booking against the forecasted demand. Coordinate and implement weekly reports with Regional Marketing and sales leadership to inform teams against changes in demand that may affect the Product Lines' ability to reach their revenue targets, using business Intelligence and data analysis software. Work closely with members of the Distribution team to ensure inventory levels in the channel are monitored and maintained at appropriate levels, using channel specific inventory reporting and metrics. Review final forecast with Product Line, Pricing and Operations team to ensure feedback on potential improvements in the monthly cycle is implemented prior to the beginning of the next cycle. Monitor forecast and allocation / quotas to identify changes and predict effects on supply chain activities and revenue, handle customer escalation management via Jira tool. Participate in the coordination of new product launches, engineering changes or EOL activities, using order management software as well as product master data suites to check on product status or release products for specific customers. Train new employees. Local telecommuting permitted up to 3 days per week.
