

Senior IT Business Analyst SAP Financial Planning BPC (f/m/div)*

Job description

Do you enjoy both, working technically and enabling others with your knowledge? As a Senior IT Business Analyst, you will get the most out of SAP CO in order to transform your internal customers' requirements into business processes within a global, company-wide SAP project, with a focus on Business Planning & Consolidation (SAP BPC) as well as reporting topics (SAP BW). Being fully committed to this project's strategic impact, you will have the opportunity to leave your footprint and to work on templates that do shape Infineon's future.

In your new role, you will:

- Actively **drive the company-wide SAP project rollout** from a **financial planning perspective** (e.g. for cost planning, headcount planning, invest planning) using your expert knowledge in **SAP CO** and **SAP BPC**
- Take over responsibility through the **full cycle implementation** from requirement engineering to deployment and 3rd level support
- Consolidate **user requirements** to create and review **functional designs**
- Conduct **tests** and provide **training for processes and functions**
- Take over the **ownership** and be an **expert for end-to-end processes** in the area of financial planning and integration into controlling
- Perform **customizing** (transport management) and **manage interfaces** to third party systems
- **Steer service providers** and **external consultants**
- Contribute to **reporting topics** to leverage the value of our data

Profile

You accept responsibility for common goals and enjoy cooperating across boundaries for finding the best solution? Great! If you furthermore, you bring an agile mindset, remain calm and solution-oriented even under uncertain circumstances, then you could be a good fit to our team. Terms like Hana views, SQL queries, data provider, integration ACDOCP & ACDOCA, aDSO templates as well as planning sequences are part of your vocabulary.

You are best suited for this task if you have:

- A degree in **Information Technology, Computer Science, Business Informatics** or similar
- **At least 5 years of professional experience** and at least **three full cycle implementations in the area of SAP CO** with full responsibility for end results
- **Very good knowledge of the SAP BPC module**, including the integration with subsequent modules in controlling and reporting (SAP BW)
