

## Quality Management System Engineer (f/m/div)\*

### Job description

Are you a natural communicator with passion for technical topics? Do you thrive in a team environment by contributing with your innovative ideas and solutions? Then this is the perfect next career step for you! As a Quality Management System Engineer, you will be part of a global quality management team striving for outstanding quality. Take the chance for a change and join our team in Cegléd!

As a Quality Management System Engineer, you will ensure high-quality standards and continuous processes efficiency and improvement. With a positive attitude and mindset, you will find the best way to solve a problem and your team working spirit will be your ally in discussing innovative solutions with your teammates.

In your new role you will:

- Be responsible for **data analysis**, proper **documentation and reporting**, support **process stability** and commit to **the quality strategy**;
- **Supervise** and **operate database tools and quality systems**, this way contributing to a continuous improvement;
- Provide **technical support** and play an active role **in deviation and change management processes**;
- Moderate and document **Failure Mode and Effects Analysis (FMEA)**;
- Communicate and **close cooperate with other Infineon departments**.

### Profile

You are excellent at seeing and understanding the importance of problem-solving, defining potential failure modes and causes, finding and developing suitable actions for them, even when under pressure. You are able to prioritize and operate proactively, using your strong organization skills and responsibility to contribute efficiently to ensure the required quality standards are met.

You are best equipped for this task if you have:

- An **University Degree** in a **technical field** (e.g. Mechanical Engineer, Electrical Engineer);
- **Experience** in the **electrical production** area;
- Relevant **experience in Quality field** and **knowledge of Quality Tools** (Cause and Effect Analysis; Root Cause Analysis, etc.)
- **Intermediate** knowledge of **MS Office** (PowerPoint, Excel, etc.).
- **Fluency in Hungarian** and **good command of English**. German would be an advantage.
