

Manager Production Management for RFS (Radio Frequency & Sensors) Products (f/m/div)*

Job description

You want to have the overview from end-to-end instead of being the expert for just one step? As a Manager for Production Management you will be responsible for the technical ramp up of our Radio Frequency and Sensors products. Here you will see the complete picture from the definition of the production landscape to the volume ramp up and handover to Operations.

In your new role you will:

- **Work closely with customers** (both internal & external) and manage their expectations and linking **requests from customer with manufacturing operations**
- **Commit yourself to milestones and targets** regarding cost, yield, volume shipped and quality from start of ramp-up until ramp up phase completed
- Connect the **overall operational management and controlling** of RFS products in ramp-up and production
- **Owner of the production strategy** and also ensure **manufacturing delivery**, throughput **capability** during ramp-up and volume production phases for RFS products
- Be responsible for **Cost of Sales improvements** through **yield, test or process improvements** in close cooperation with all related production sites
- **Lead projects and task force/ focus teams** during customer escalations

Profile

You remain focused on solutions, open, and flexible even when under pressure and ensure high quality by foresighted planning. Furthermore, you are personally committed to the customer's concerns and awards them a high priority.

You are best equipped for this task if you have:

- Achieved a degree in **Electrical Engineering, Physics, Telecommunication, Electronics** or a comparable program
- Gained at least **3-5 years of professional experience** within **Product Engineering, Supply Chain Development, Product Marketing** or **production related** areas
- Experience in **working with customers**
- Obtained **working knowledge in Frontend** or **Backend Manufacturing Processes**
- Experience in **working agile** as well as the **willingness to adapt to volatile business situations**
- **Entrepreneurial spirit** to **represent Infineon** towards Subcons and Customers
- **Willingness to travel** to production sites (within Europe and Asia)
- Have **fluent English skills** – German or the willingness to learn it would be an added plus
