

Staff Engineer, Analog & Mixed-Signal Design

Job description

You have at least 5 years of analog and mixed-signal design experience including all aspects from definition to production. Furthermore, you are proficient with the complete suite of Cadence tools for mixed-signal design. In this collaborative roll, you will team with physical designers, FAEs and quality/test to ensure a successful end product. Come join Infineon's Power & Sensor Systems division in which our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient!

In your new role you will:

- Perform all aspects of **analog/mixed signal IC design** from definition to production. Potential areas of design include precision analog & I/O blocks, A/D & D/A converters, PLLs, as well as higher voltage integrated drivers, switching FETs, and sense & protection circuitry
- Complete **schematic capture, circuit analysis and simulations** utilizing full **Cadence design flow**
- Guide physical designers on critical aspects of analog layout and perform post layout parasitic extraction & circuit verification
- Document and review critical aspects of the **design architecture, implementation, and testing** and conduct milestone reviews with management throughout the design cycle
- Perform **silicon bench evaluation**, guide technicians for full characterization, and work closely with the FA team for physical de-bugging
- Work cooperatively with Qualification team for reliability testing of the product
- Work cooperatively with test engineering to ensure testability and low PPM during production
- Oversee block level behavioral modeling for **chip top level verification**

Profile

You pay full attention to the details of design - from definition to production. You demonstrate strong time management skills. Your excellent communication and interpersonal skills are key towards supporting and working well with others in our team environment.

You are best equipped for this task if you have:

- MS or PhD in Electrical Engineering or related field and minimum of **5 years of analog/mixed-signal design**. RH IC design experience is a plus.

At a glance

Location: **Andover, MA (United States)**
Job ID: **308916**
Start date: **as soon as possible**
Entry level: **5+ years**
Type: **Full time**
Contract: **Permanent**

- Attention to detail during all aspects of architecture definition, circuit design, debug and documentation
- Design experience with **Power Management ICs and LDMOS/BCD** process technologies and **PDKs**
- Proficiency with the complete suite of **Cadence tools** for **mixed-signal design**

Infineon **Power & Sensor Systems (PSS)** semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world.

Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.

– We drive leading-edge power management, sensing and data transfer capabilities –

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Infineon Technologies Americas Corp. is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex (including pregnancy, childbirth, or related medical conditions), gender identity, national origin, ancestry, citizenship, age, physical or mental disability, legally protected medical condition, family care status, military or veteran status, marital status, domestic partner status, sexual orientation, or any other basis protected by local, state, or federal laws. Applicants with questions about access or requiring a reasonable accommodation for any part of the application or hiring process should contact the Talent Network by phone at (408) 503-2194.

Employment at Infineon is contingent upon proof of your legal right to work in the United States under applicable law, verification of satisfactory references and successful completion of a background check and drug test, and signing all your on-boarding documents .

In some instances, if applicable, U.S. export control laws require that Infineon obtain a U.S. government export license prior to releasing technologies to certain persons. This offer is contingent upon Infineon's ability to satisfy these export control laws as related to your employment and anticipated job activities. The decision whether or not to submit and/or pursue an export license to satisfy this contingency, if applicable, shall be at Infineon's sole discretion.

IMPORTANT NOTICE :

Infineon is requiring all new U.S. employees and contractors to be fully vaccinated against COVID-19. Full vaccination is defined as two weeks after both doses of a two-dose vaccine or two weeks since a single-dose vaccine has been administered. Anyone unable to be vaccinated, either because of a sincerely held religious belief or a medical condition or disability that prevents them from being vaccinated, can request a reasonable accommodation.

Infineon Technologies takes data privacy and identity theft very seriously. As such, we do not request personally-identifiable information (PII) from applicants over the internet or electronically. Please kindly refrain from disclosing your PII electronically during the application process or to unauthorized websites that may purport to be

Infineon or any of our affiliates.
