

## Sensor Technical Program Manager

### Job description

Infineon's PSS (Power & Sensor Systems) division has an exciting opportunity for a Sensors Technical Program Manager to work with some of the leading consumer electronics companies in the world. Join us and advance our industry leading MEMS sensor solutions with a global company that makes life easier, safer and greener. Apply today!

#### In your new role you will:

- Be responsible for the **program management** of Infineon's best-in-class **microphone and sensor products** at leading OEM customers
- **Capture product requirements** and **support the development of new product ideas** at forefront of consumer electronics market
- Provide **input for market / competitor insights**, value proposition, business case creation, positioning, pricing and product roadmap
- Ensure **design-wins** working together with Sales on product level
- Track **joint innovation and new product introduction** (NPI) projects with customer and internal teams, and set and drive agenda for customer meetings
- **Collaborate with the global organization** to ensure customer project milestones and commitments are met from early prototype builds to ramp-up
- **Drive interaction with customer's Engineering, Quality, and EPM teams**
- **Drive design in status and identify roadblocks**
- Ensure alignment with packaging partners in the US on joint customer projects
- Monitor sensor projects at subcontractors
- Ensure delivery of NPI build quantities to customer

### Profile

#### You are best equipped for this task if you have:

- 3+ years of industry experience in a **technical marketing or program / project management** role
- Bachelor's Degree or greater in Electrical or Mechanical Engineering or Computer Science
- Demonstrated **excellence of project management skills**
- Experience with **semiconductors and ASIC design**
- Experience with **MEMS sensors and acoustics** highly preferred
- Ability to **communicate effectively** and **drive influence across functional boundaries**

### At a glance

Location: **Milpitas, CA**  
Job ID: **309934**  
Start date: **immediately**  
Entry level: **3-5 years**  
Type: **Full time**  
Contract: **Permanent**

- **High accountability** and **project execution** oriented mindset
- **Excellent team player**, with ability to effectively promote teamwork across the company
- **Flexible** work hours to maximize overlap with CET time zone
- Occasional travel required

Infineon **Power & Sensor Systems (PSS)** semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world.

Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.

– **We drive leading-edge power management, sensing and data transfer capabilities** –
