

Product Application Engineer Automotive MOSFET (f/m/div)*

Job description

You love technology and working on new products with customers? We drive electrification of cars, contribute to a cleaner environment and enable drivers to become passengers. With strong application knowledge and very good customer relationships, we can define the products to make these changes happen and to secure our leadership position in this attractive market.. Join our Automotive High Power team in Munich! With this position you will be entering our „technical ladder“: our career path for experts. You will be able to focus deeply on applications and products – while further pursuing your career. As you continually expand your expert knowledge, puzzle over matters and solve problems, you will position yourself as a thought leader – thus helping our products improve our world a bit more each day.

In your new role you will:

- **Drive technical Go to Market activities** on product level to enable design-in / win
- **Provide 2nd and 3rd level customer support** on product level
- **Act as Lead Technical Customer Interface** on product level in commercialization phase
- **Support Product Management** with technical and engineering knowledge
- **Lead and organize technical product trainings** to internal and external partners
- **Consolidate and structure inputs from market to Sales and R&D organization**

Profile

You listen actively to the customer and consider his point of view, thoughts, and ideas. Your excellent communication and presentation skills have always helped you master the need for alignment across internal and external contacts.

You are best equipped for this task if you have:

- A **degree in Electrical Engineering** or a related field
- **At least 6 years of experience** within **semiconductors** as well as the **automotive industry** in the **fields of application engineering, system engineering or technical marketing**
- Experience **in circuit design**
- Preferably **experience with analog circuits** and/or **measurement technology**
- The ability to **work in cross-functional team**
- **Fluent English** and **good German (at least B2) communication skills** to master the need for alignments across internal and external contacts
