

Quality Engineer (f/m/div)*

Job description

Do you feel satisfied only when quality is at its highest standards? Do you strive for working on the front end of the process, being challenged every day, and performing high-level responsibility tasks? Are you ready to work in a dynamic multicultural environment? Then we have the perfect challenge for you! Join us in Cegléd as our new Quality Engineer and meet all the necessary conditions to be successful!

As a Quality Engineer, you will play an active role in ensuring high-quality standards and continuous efficiency and improvement. You will analyze complex situations and different information in order to find precise and reliable solutions. In this role, you will be in close contact with your team and other departments and your strong communication skills will be your ally in the discussion of quality matters.

In your new role you will:

- Provide general **support** to the production line and operative work **regarding quality engineering tasks** (dealing with escalation, blocking and releasing items with a quality issue);
- Actively participate in **root cause analysis**;
- Have an effective approach to **problem-solving** (8D methodology and Six Sigma);
- Continuously contribute to **quality improvement**;
- Communicate and close **cooperate with other Infineon departments**.

Profile

You are a natural problem-solver with a strong commitment to team environment dynamics, contributing with your expertise and sense of responsibility to ensure the required quality standards are met. You recognize potential obstacles in time and use them as an opportunity for improvement. Your quality orientation allows you to solve problems and provide effective solutions.

You are best equipped for this role if you have:

- A **university or college degree in Engineering** (Automation Engineering would be a plus);
- **3-5 years of relevant work experience in quality engineering**;
- Engineering **experience in a production environment** would be an advantage;
- **Good command of English**; Hungarian would be a plus;
- Strong **communication skills** and a methodical approach;
- Analytical **thinking** and a **strong team player spirit**;
