

## Productivity Manager for power semiconductor modules (f/m/div)\*

### Job description

Do you enjoy working in a global environment with intercultural and cross-functional teams? Do you love to work on making things better, faster and more efficient? Join Infineon as Productivity Manager for power semiconductor modules (f/m/div)\* and help our products improve our world a bit more each day!

In your new role you will:

- Take over **product responsibility** after completion of the development
- Be responsible for **yield stabilisation/optimisation** during ramp-up and production as well as **yield monitoring**
- Identify and implement **productivity improvement, cost reduction and ratio projects** throughout the manufacturing chain
- Drive **taskforces, focus teams and 8Ds** to address and fix products or manufacturing issues
- Develop and implement new **methods/tools for product analysis** in a global team

### Profile

In this role you understand how to quickly establish a trusting, constructive collaboration with all relevant interfaces. In doing so, you assume responsibility for our common goals and put team results above your own interests. You are a self-motivated person who strives for productivity improvement, quality, cost-efficiency, risk-prevention and continuous improvement. As a role model for open communication and feedback, you know how to successfully align with various people internationally.

You are best equipped for this task if you have:

- A **university degree** in **electrical engineering, physics** or a related technical field
- At least **5+ years industry experience** in **project management, task force leadership or productivity management**, ideally with a global perspective
- Strong **analytical skills** in combination with **excellent English and German communication skills**
- A passion for **intercultural and international teamwork** in which you can use your ability to **present and report** in a convincing manner
