

## Senior Project Manager Chip Development for E-Mobility (f/m/div)\*

### Job description

You want to cooperate with renowned players in the automotive industry? You would love to manage diverse projects and dive deeply into technical topics? Then join us and bring our Project Management for chip development for E-Mobility to the next level. This position is part of the Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will be responsible for the following tasks:

- **Initiate, plan, steer, control and close development projects** in the field of automotive E-Mobility, incl. **team setup for smaller projects, resource planning, timeline, work packages, budget planning, controlling, documentation**
- **Direct project activities across different sites** from Munich, Warstein, Dresden and Malaysia
- **Guide project teams** from a technical perspective
- **Manage and evaluate risks efficiently**, according to FMEA methods
- **Plan experiments, analyze outcomes** and assess prototypes
- **Consult and act as interface to internal customers** (e.g. Application Engineering, R&D, Marketing and production sites)

### Profile

You remain aware of the big picture even in complex situations and take decisions despite uncertain circumstances. You commit yourself to the results of your team and the company as a whole. As a true team player you coordinate your work with colleagues and regularly share your insights with them.

You are best equipped for this task if you have:

- A **degree in Physics, Electrical Engineering** or a similar field, preferable a PhD
- **At least 6 years of relevant working experience**, ideally in the semiconductor or power electronic industry, thereof 4 years as a project leader
- **In-depth project management knowledge** in terms of project initiation, planning and closing including reporting and documentation; preferably gathered an IPMA Level C certification
- The **ability to understand and structure complex project situations**; manage crisis situations, consolidate and present those to senior management level
- A **solid technical understanding of power electronic device physics, chip development and semiconductor processing**
- A **proactive mindset** with strong communication and moderation skills to align between internal and external stakeholders
