

Senior Project Manager Discrete Product Development for E-Mobility (f/m/div)*

Job description

You want to cooperate with renowned players in the automotive industry? You would love to manage big projects internationally and dive deeply into technical topics? Then we have just the right position for you! As Senior Project Manager for Discrete Product Development you will develop ideas to their full implementation in close collaboration with the customer! Come and join us as to work on the leading edge of the promising E-Mobility movement and take the product development of our power device products to the next level.

This position is part of the Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- **Initiate, plan, steer, control and close development projects in parallel** in the field of **automotive e-mobility**, incl. team setup, resource planning, timeline, work packages, budget planning, controlling, documentation
- **Conduct project activities across different sites** from Munich to USA and Malaysia and **across numerous technologies and package platforms**
- **Lead the project teams** from a technical perspective, **be the Project Owner for the package development**
- **Manage and evaluate risks efficiently**, according to FMEA methods
- Plan **experiments, delegate work packages, analyze outcomes and assess test-chips and characterize prototypes**
- **Consult and act as interface to internal and external customers** (e.g. Application Engineering, R&D, Project Management, Sales and other departments)

Profile

You remain aware of the big picture even in complex situations and take decisions despite uncertain circumstances. You commit yourself to the results of your own team and the company as a whole. As a true team player you coordinate your work with colleagues and regularly share your insights with them.

You are best equipped for this task if you have:

- **A degree in Electrical Engineering, Physics, Material Science or similar fields**, preferably a PhD
