

Project Manager Embedded Software Development (f/m/div)*

Job description

Are you ready for a career in a fast-moving, future-oriented environment? You have a passion for making our lives easier, safer and greener? We are employing latest technology such as neural networks and other sophisticated software techniques to extract useful information from our leading-edge consumer radar devices. To strengthen our development team, we are looking for a highly motivated (Senior) Project Manager, which has also worked with agile teams. This position is part of Infineon's Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- **Align close with your stakeholders** like **product development** teams, project owner, **chip development**, **quality** and **application engineering**
- **Drive leading edge solutions for high volume consumer applications**
- **Coordinate project activities** across various Infineon sites
- **Structure your project, handle the project controlling** and resource planning regarding compliance of schedule, costs, risks, performance and quality objectives
- Be continuously **focused on project quality**
- **Assess progress** and **ensure that goals are met**, even in the face of challenges
- **Monitor changes** against original project goals and be prepared for adapting plans
- Identify stakeholders and **develop relationships** while being aware of their interest for the project

Profile

You anticipate even the future needs of customers and engage actively with the customer about these needs? Furthermore, you concentrate your creativity and knowledge on producing results with real added value. If you feel responsible for and contribute to the department's success, then you should join our team!

You are best equipped for this task if you have:

- A **degree in Electrical Engineering, Electronics, Computer Engineering, Physics, Industrial Engineering** or similar
- **At least 5+ years of professional experience** in the semiconductor industry, ideally in the area of **software** and **system product development** combined with **sensor knowledge**

Nadine Patriarca Roth
Talent Attraction Manager

- Relevant experience in **project management** of **embedded software development projects**
- Project management knowledge in terms of **project initiation, planning** and **closing**, including **reporting and documentation**
- Experience with common **project management tools and methodologies**
- Exposure to **Agile methodologies** such as **Scrum** and **Kanban** would be an added advantage
- **Fluent English skills** in order to interact successfully with cross-functional teams globally as well as at least **basic German skills**
- The willingness to learn quickly
