

Senior Director Project Management (f/m/div)*

Job description

Are you keen taking new perspectives and challenges and thinking out of the box? Do you describe yourself as a great communicator who can bring people together and take decisions if needed? You like to be at the pulse of time shaping the technologies addressing future trends linking the real and the digital world? As Senior Director Project Management you are able to bring all these aspects into reality and create state-of-the-art Technology. The PJM Career is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role, you will:

- Take the **overall technical integration lead in a highly complex technology project**
- Be responsible for definition, planning and tracking of **technical project targets** and delivery of **technical solution according to specification**
- **Take technical decisions**; plan, organize, drive, and control integration, validation and delivery of technical content & solution
- Ensure appropriate **composition of project technical team** with clearly defined responsibilities and interfaces
- **Perform continuous risk evaluation** and tracking as well as plan and execute mitigation measures
- Prepare **steering committee and customer meetings** in close alignment with the project owner

This position can be filled at site Regensburg or Munich.

Profile

You take the customer to the heart of your actions and award them high priority. You are an excellent networker and you know how to provide high quality information to your partners and customers. Therefore you quickly establish lasting relationships and communicate openly, clearly, and coherently across organizations and hierarchies from engineers up to senior management.

You have a very well structured and sustainable working mode and a clear notion of how innovation contributes to Infineon's commercial success. Even in complex situations you remain aware of the big picture and weigh up opportunities and risks carefully.

You are best equipped for those tasks if you have:

- **A scientific or engineering degree**
