

Manager Product Quality & Functional Safety – Microcontrollers (f/m/div)*

Job description

Our products control engines to make a safer and more comfortable driving experience possible. Today they are in almost every new car worldwide! As Manager for Product Quality & Functional Safety in the automotive microcontroller sector, you always focus on our high-quality requirements and our customer-first approach. You are our quality expert throughout the entire product lifecycle, starting with qualification followed by approval and leading into series production. Does this sound interesting? Then this is the right position for you!

In your new role you will:

- Facilitate the **delivery release of microcontroller products** by providing the necessary **qualification**
- **Be responsible** for the compilation of **qualification plans** based on the relevant standards (e.g. AEC-Q100) **and ensure a smooth implementation** in order to meet stakeholder requirements, deadlines and cost
- Provide **quality reporting** to our internal and external customers
- **Be the point of contact regarding quality matters within volume production**. This involves working hand-in-hand with the **business unit as well as with our global production sites**
- Monitor the **compliance with the defined quality standards** and quality assurance guidelines as well as drive **active risk management**

Profile

The customer is king, the product ‘your baby’ and Infineon your team. You manage to find the ideal solution for all of them, by listening closely to their needs and continuously striving for the goal of “zero-defect”. In this process it is natural for you to cooperate across boundaries, building your network across developers, quality managers, and production specialists, as well as to value their diverse contributions. Regarding your own work, you set yourself ambitious goals and you are not afraid to take on new challenges, even if you do not always know the right path to an eventual solution in advance.

You are best equipped for this task if you have:

- A technical **degree** in **Electrical Engineering, Physics, Chemistry** or similar
- At least **3 years of relevant work experience** within the area of **semiconductors** or within the **automotive industry**

At a glance

Location: **Munich (Germany)**
Job ID: **317841**
Start date: **as soon as possible**
Entry level: **3-5 years**
Type: **Full time**
Contract: **Permanent**

Contact

Jana Karger
Talent Attraction Manager

- A solid **technical understanding** regarding the structure and function of **semiconductor products**
- **Know-how of quality methods** such as **FMEA, 8D, 3x 5why or APQP**
- **Intercultural competence** as the cooperation with international global teams and customers will be a central part of your job
- Excellent **English language skills**, German language skills would be a plus

Benefits

- **Munich:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; On-site creche and kindergarden with 120 spots, open until 6pm; Holiday child care; On-site social counselling and works doctor; Health promotion programs; On-site gym, jogging paths, beachvolleyball, tennis & soccer court; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement ; Performance bonus; Reduced price for public transport and very own S-Bahn station; Access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –

Semiconductors are essential to realize key trends like eMobility, automated driving and secure, connected cars. Infineon **ATV** is the #1 semiconductor partner in the fast-changing automotive world, based on our system knowledge coupled with our passion for innovation and quality. We are a key driver in the ever-advancing pace of digitalization in the automotive industry.

Quality Management

Infineon´s Quality Management department acts proactively to satisfy the needs of our customers to increase their success and to ensure 'best in class' product quality. Internally the department develops a living quality culture at all levels within the automotive division and at our partners.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
